

Portfolio Keynote Template

The Portfolio template offers a professional look for your unique Keynote slideshows. It includes 20 masters and 2 slide sizes, which allows you to choose the best layout for your information. The modern, polished layouts go beyond mere backgrounds, fonts, and bullets: they contain matching charts, diagrams, tables, and other data visualization elements. The template can be opened and edited in Keynote 6.0 or later versions.

To view all slides, available with the template, click the '+ Add Slide' button in the Toolbar.

Most objects in the template can be easily recolored, reshaped, moved, or removed by editing the master slides. You can change the background to a color, gradient, or photo with a simple modification of the master. Type or paste your own text, add and remove text boxes, and change the font if you wish. Edit the charts and diagrams to fit your data. Drag your photos or pictures onto media placeholders to replace the stock images.

What is included

- 2 .kth files for different slide sizes (Standard 4:3 and Widescreen 16:9)
- The theme uses the following fonts: Didot Bold, Helvetica Neue Regular

You can use Portfolio for commercial purposes; however, its elements can be included in publications for resale only if they are decorative in nature and not the primary value or purpose of the product.
