Too Minty Keynote Template

The Too Minty template offers a professional look for your unique Keynote slideshows. It includes 44 masters and 2 slide sizes, which allows you to choose the best layout for your information. The modern, polished layouts go beyond mere backgrounds, fonts, and bullets: they contain matching charts, diagrams, tables, and other data visualization elements. The template can be opened and edited in Keynote 6.0 or later versions.

Most objects in the template can be easily recolored, reshaped, moved, or removed by editing the master slides. You can change the background to a color, gradient, or photo with a simple modification of the master. Type or paste your own text, add and remove text boxes, and change the font if you wish. Edit the charts and diagrams to fit your data. Drag your photos or pictures onto media placeholders to replace the stock images.

What is included

- 2 .key files for different slide sizes (Standard 4:3 and Widescreen 16:9)

- The theme uses the following fonts: Helvetica Neue Medium, Helvetica Neue Bold, Avenir Next Regular

Contact us

You can use Too Minty for commercial purposes; however, its elements can be included in publications for resale only if they are decorative in nature and not the primary value or purpose of the product.

If you should face any problems with the template, please email us at *support@jumsoft.com*.
