creathrive|design

Guidebook

For template made by Creathrive in Keynote version

* *If you're using older version of Keynote,*
some instruction / function might not work properly.
Please make sure to update your Keynote to latest version.

Font Download

This template is using additional free fonts to make it works.

Please make sure to download and install this font(s) below before start building your presentation.

Ignore any missing fonts warning other than below. (if there is any)
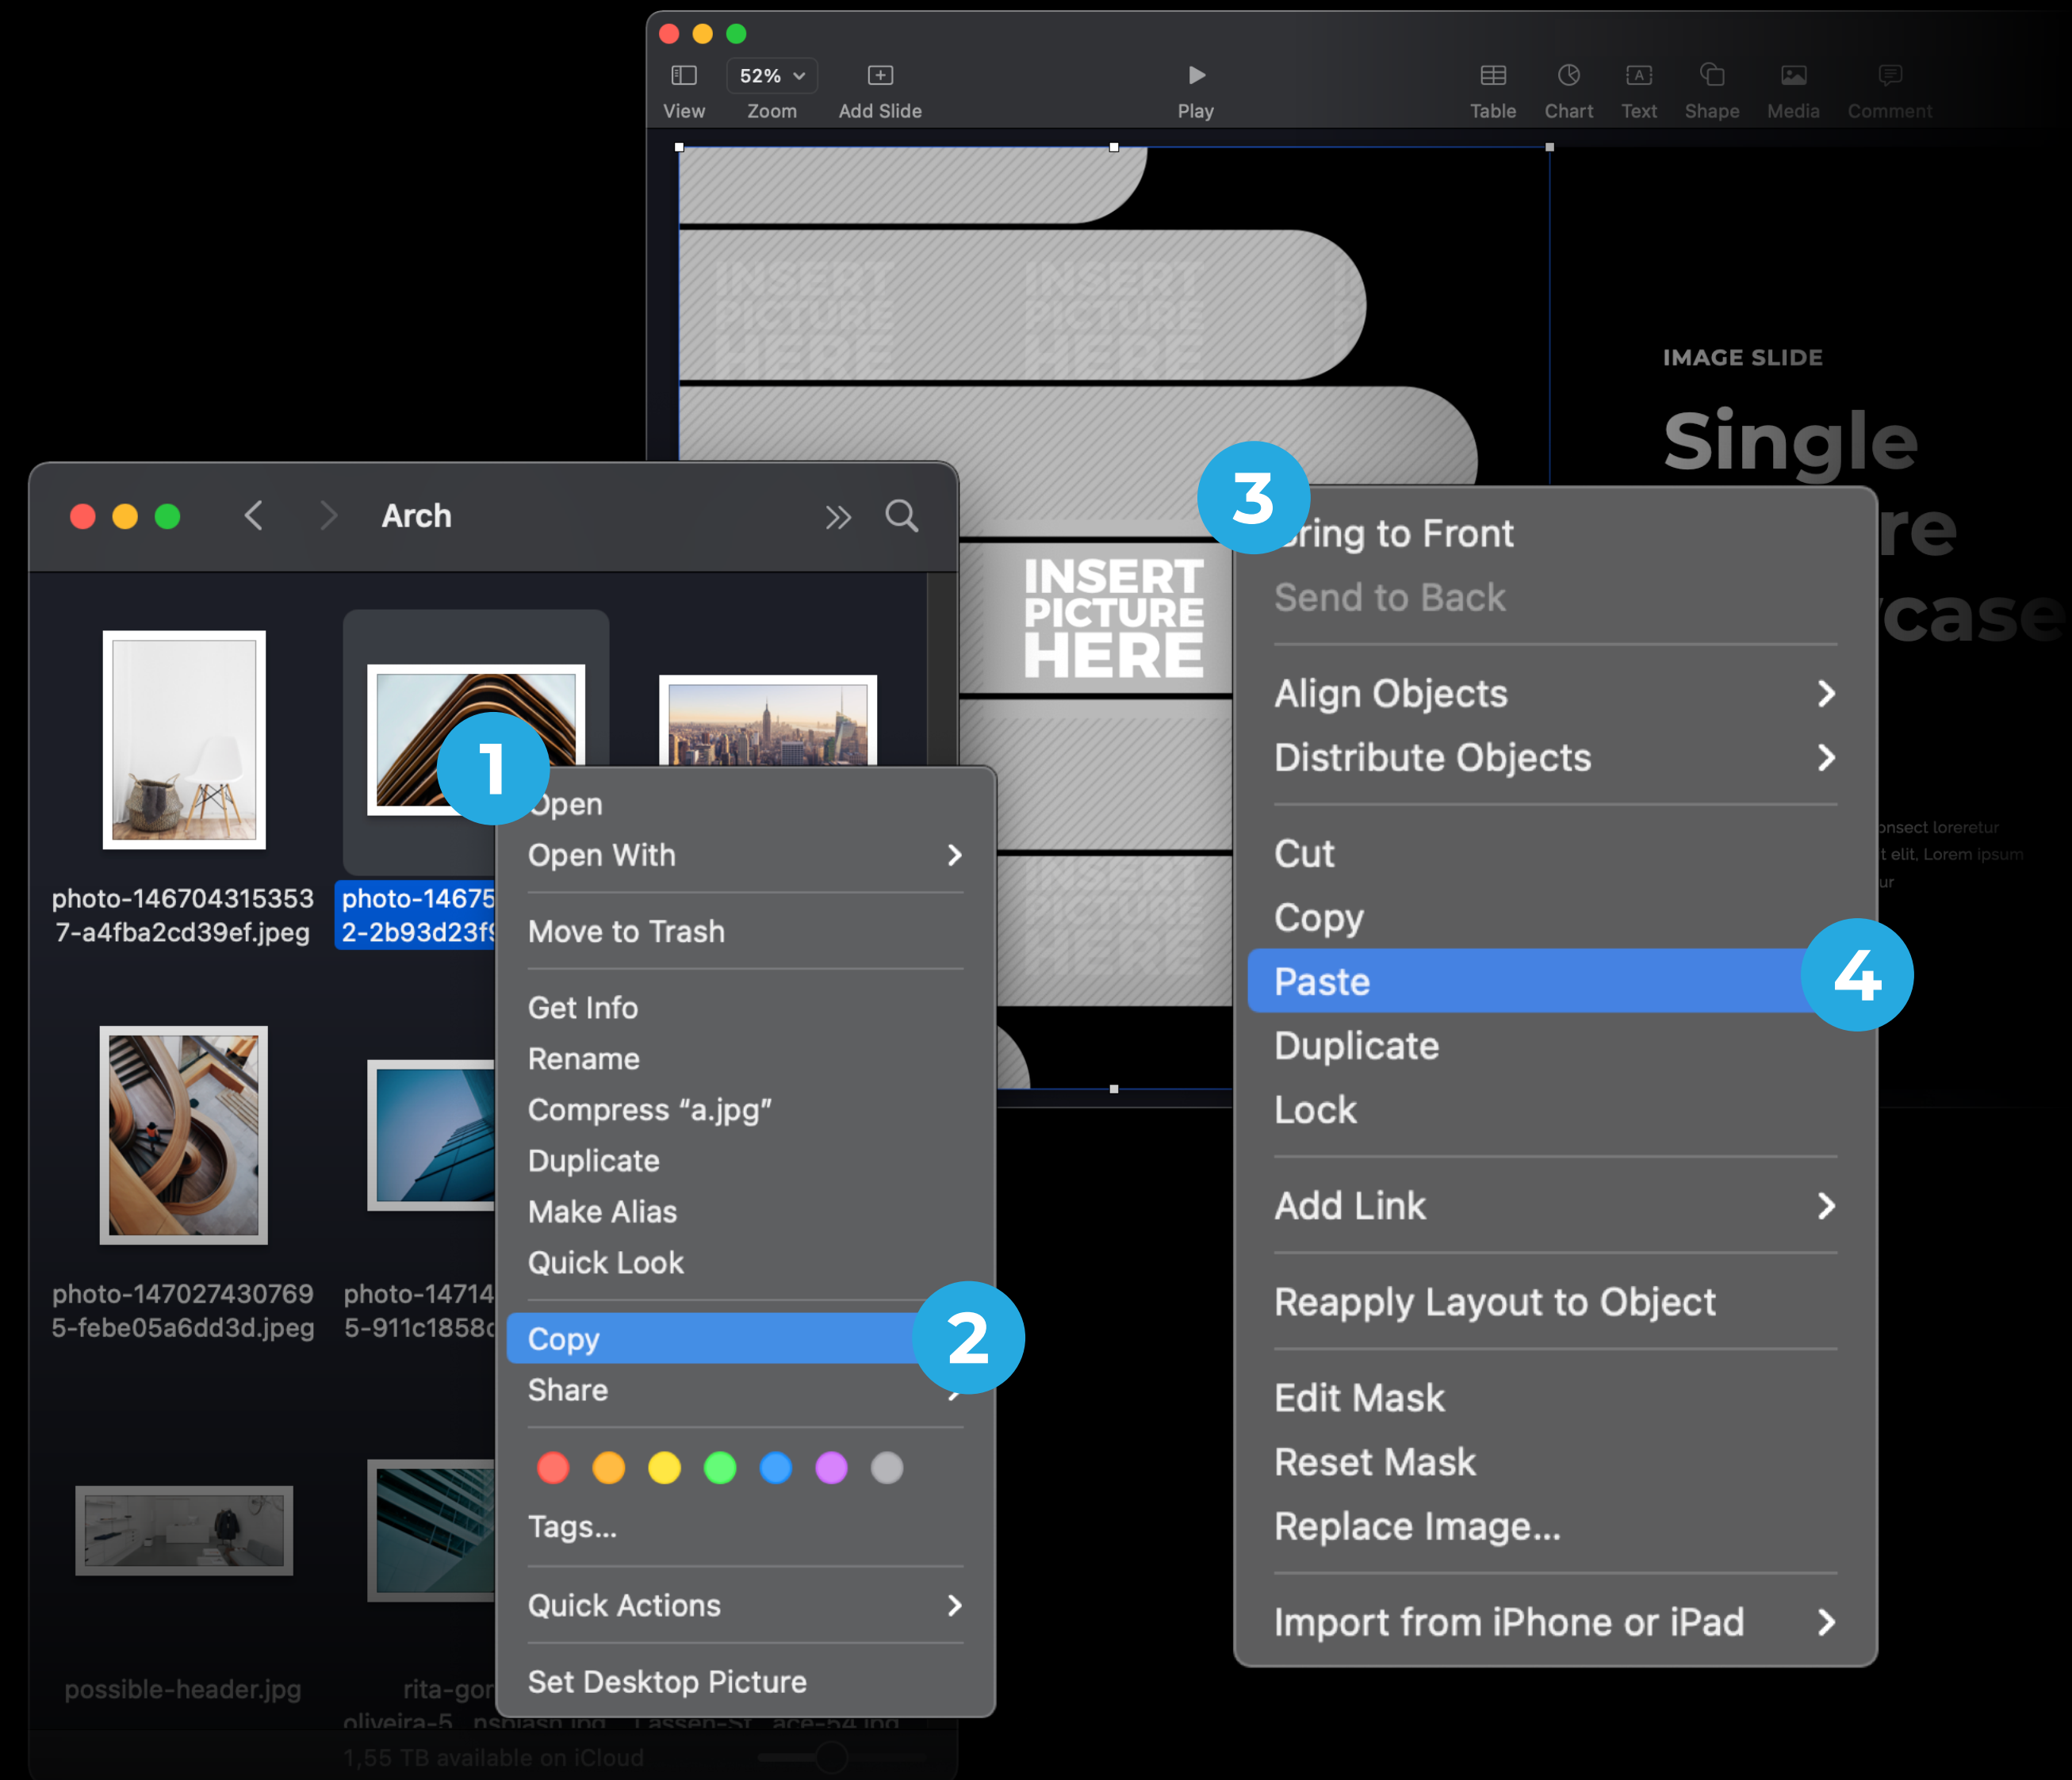

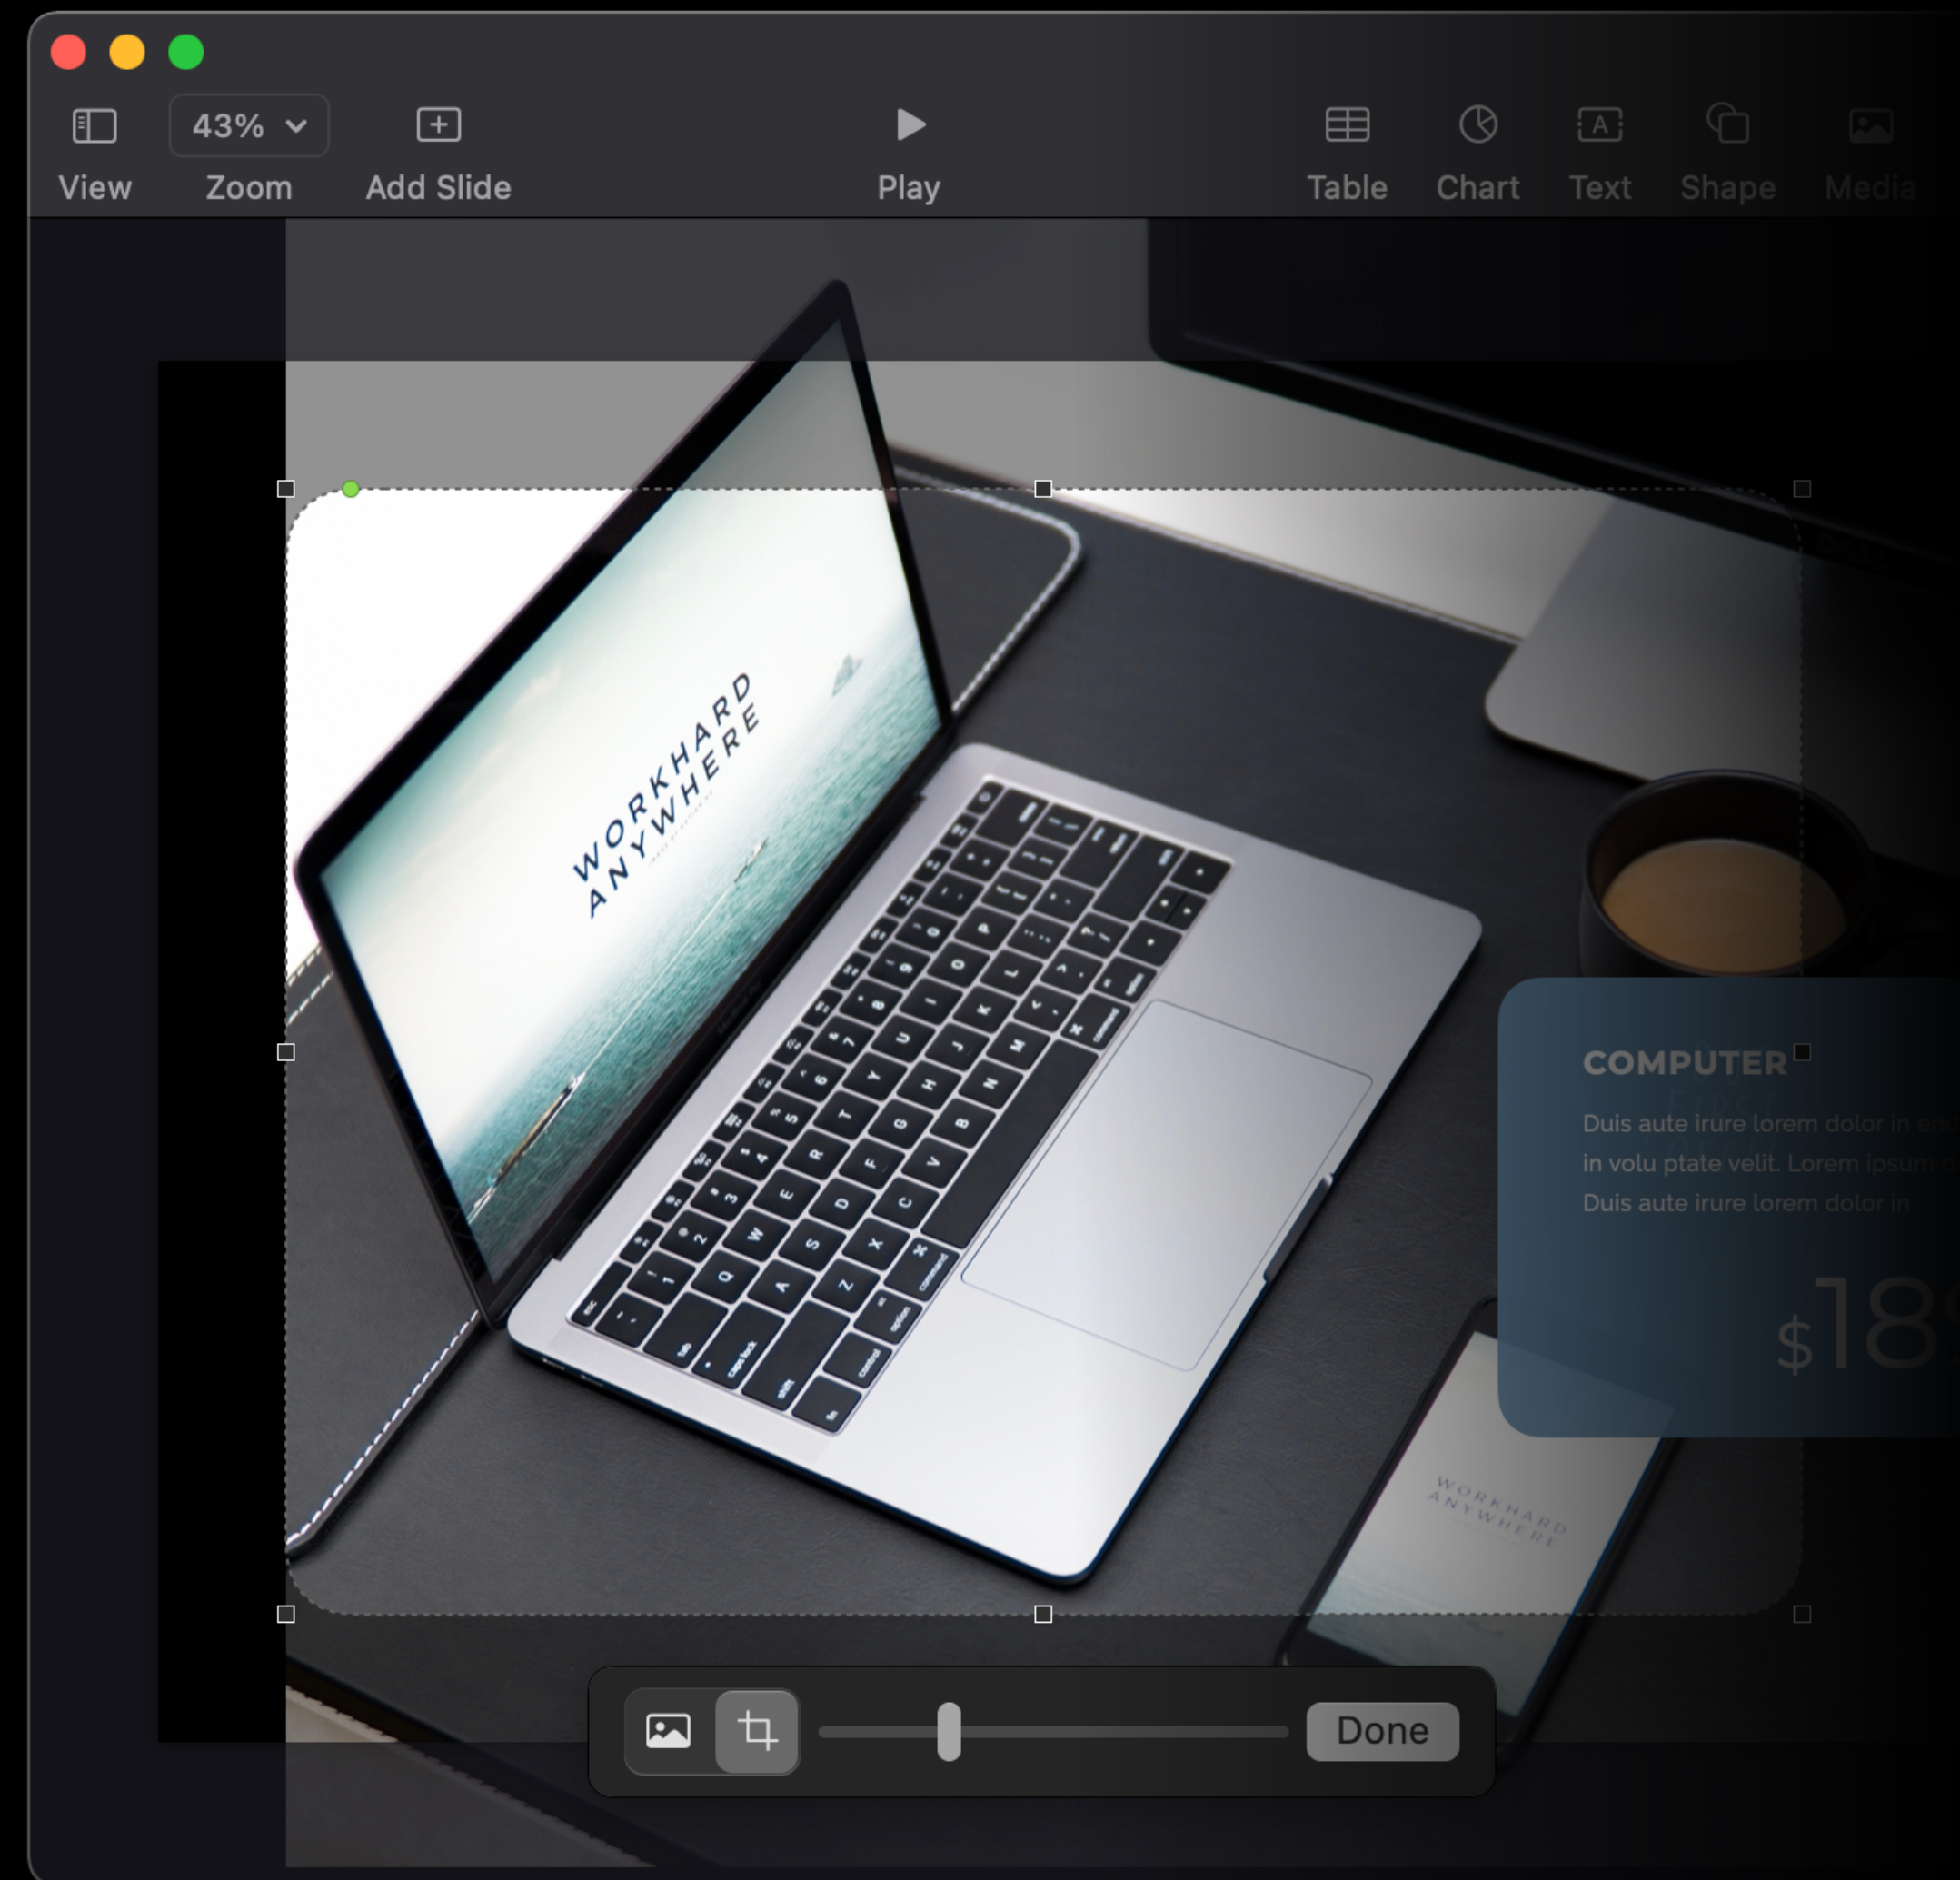

Montserrat

https://www.fontsquirrel.com/fonts/montserrat

Raleway

https://www.fontsquirrel.com/fonts/raleway

Change
Pictures

1 **Select picture** from your folder.

2 Right click then select **COPY**

3 Go to your template, then
select & right click Image Placeholder
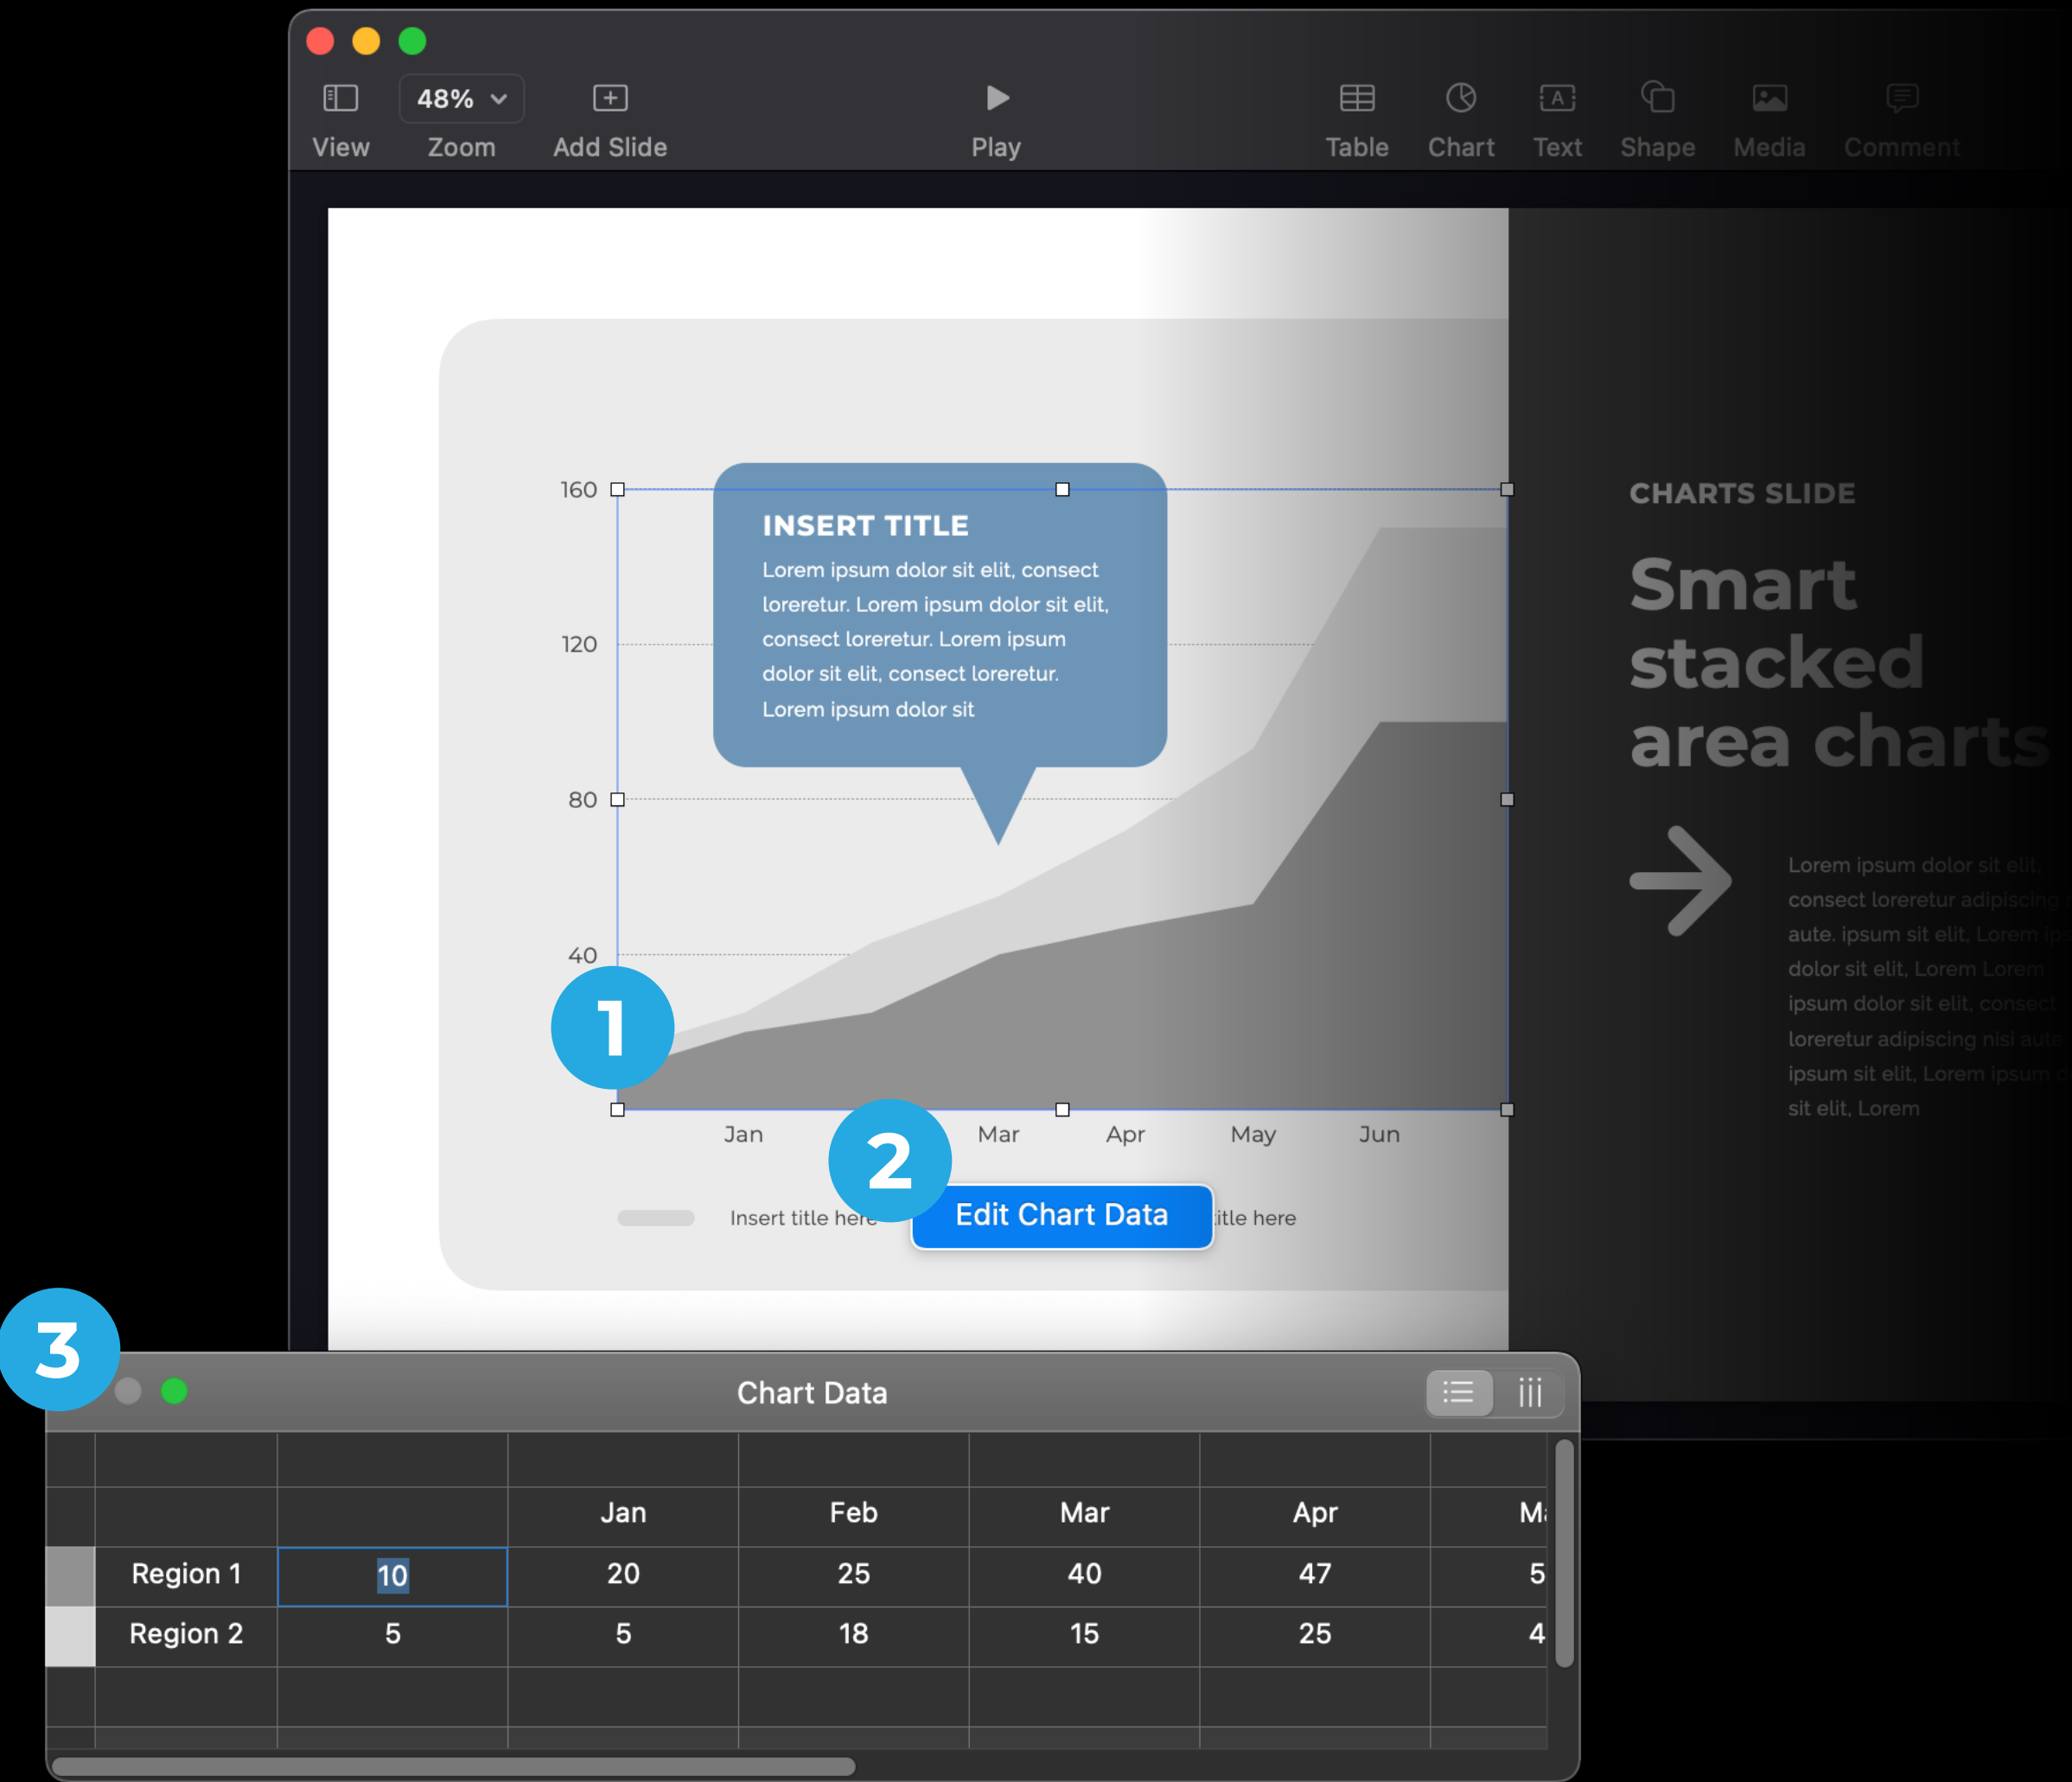

4 Select **PASTE.** Done.

Picture Adjustment

1 **Double click Image Placeholder.**

2 Adjust picture size or change picture position within frame

Smart Charts

1 Click the **SMART CHARTS**

2 Select **EDIT CHART DATA**

3 Change the value and it will reflect to chart right away.

! *Some charts may covered by some object on the top layer. Please make sure you click the chart until you see the button.*
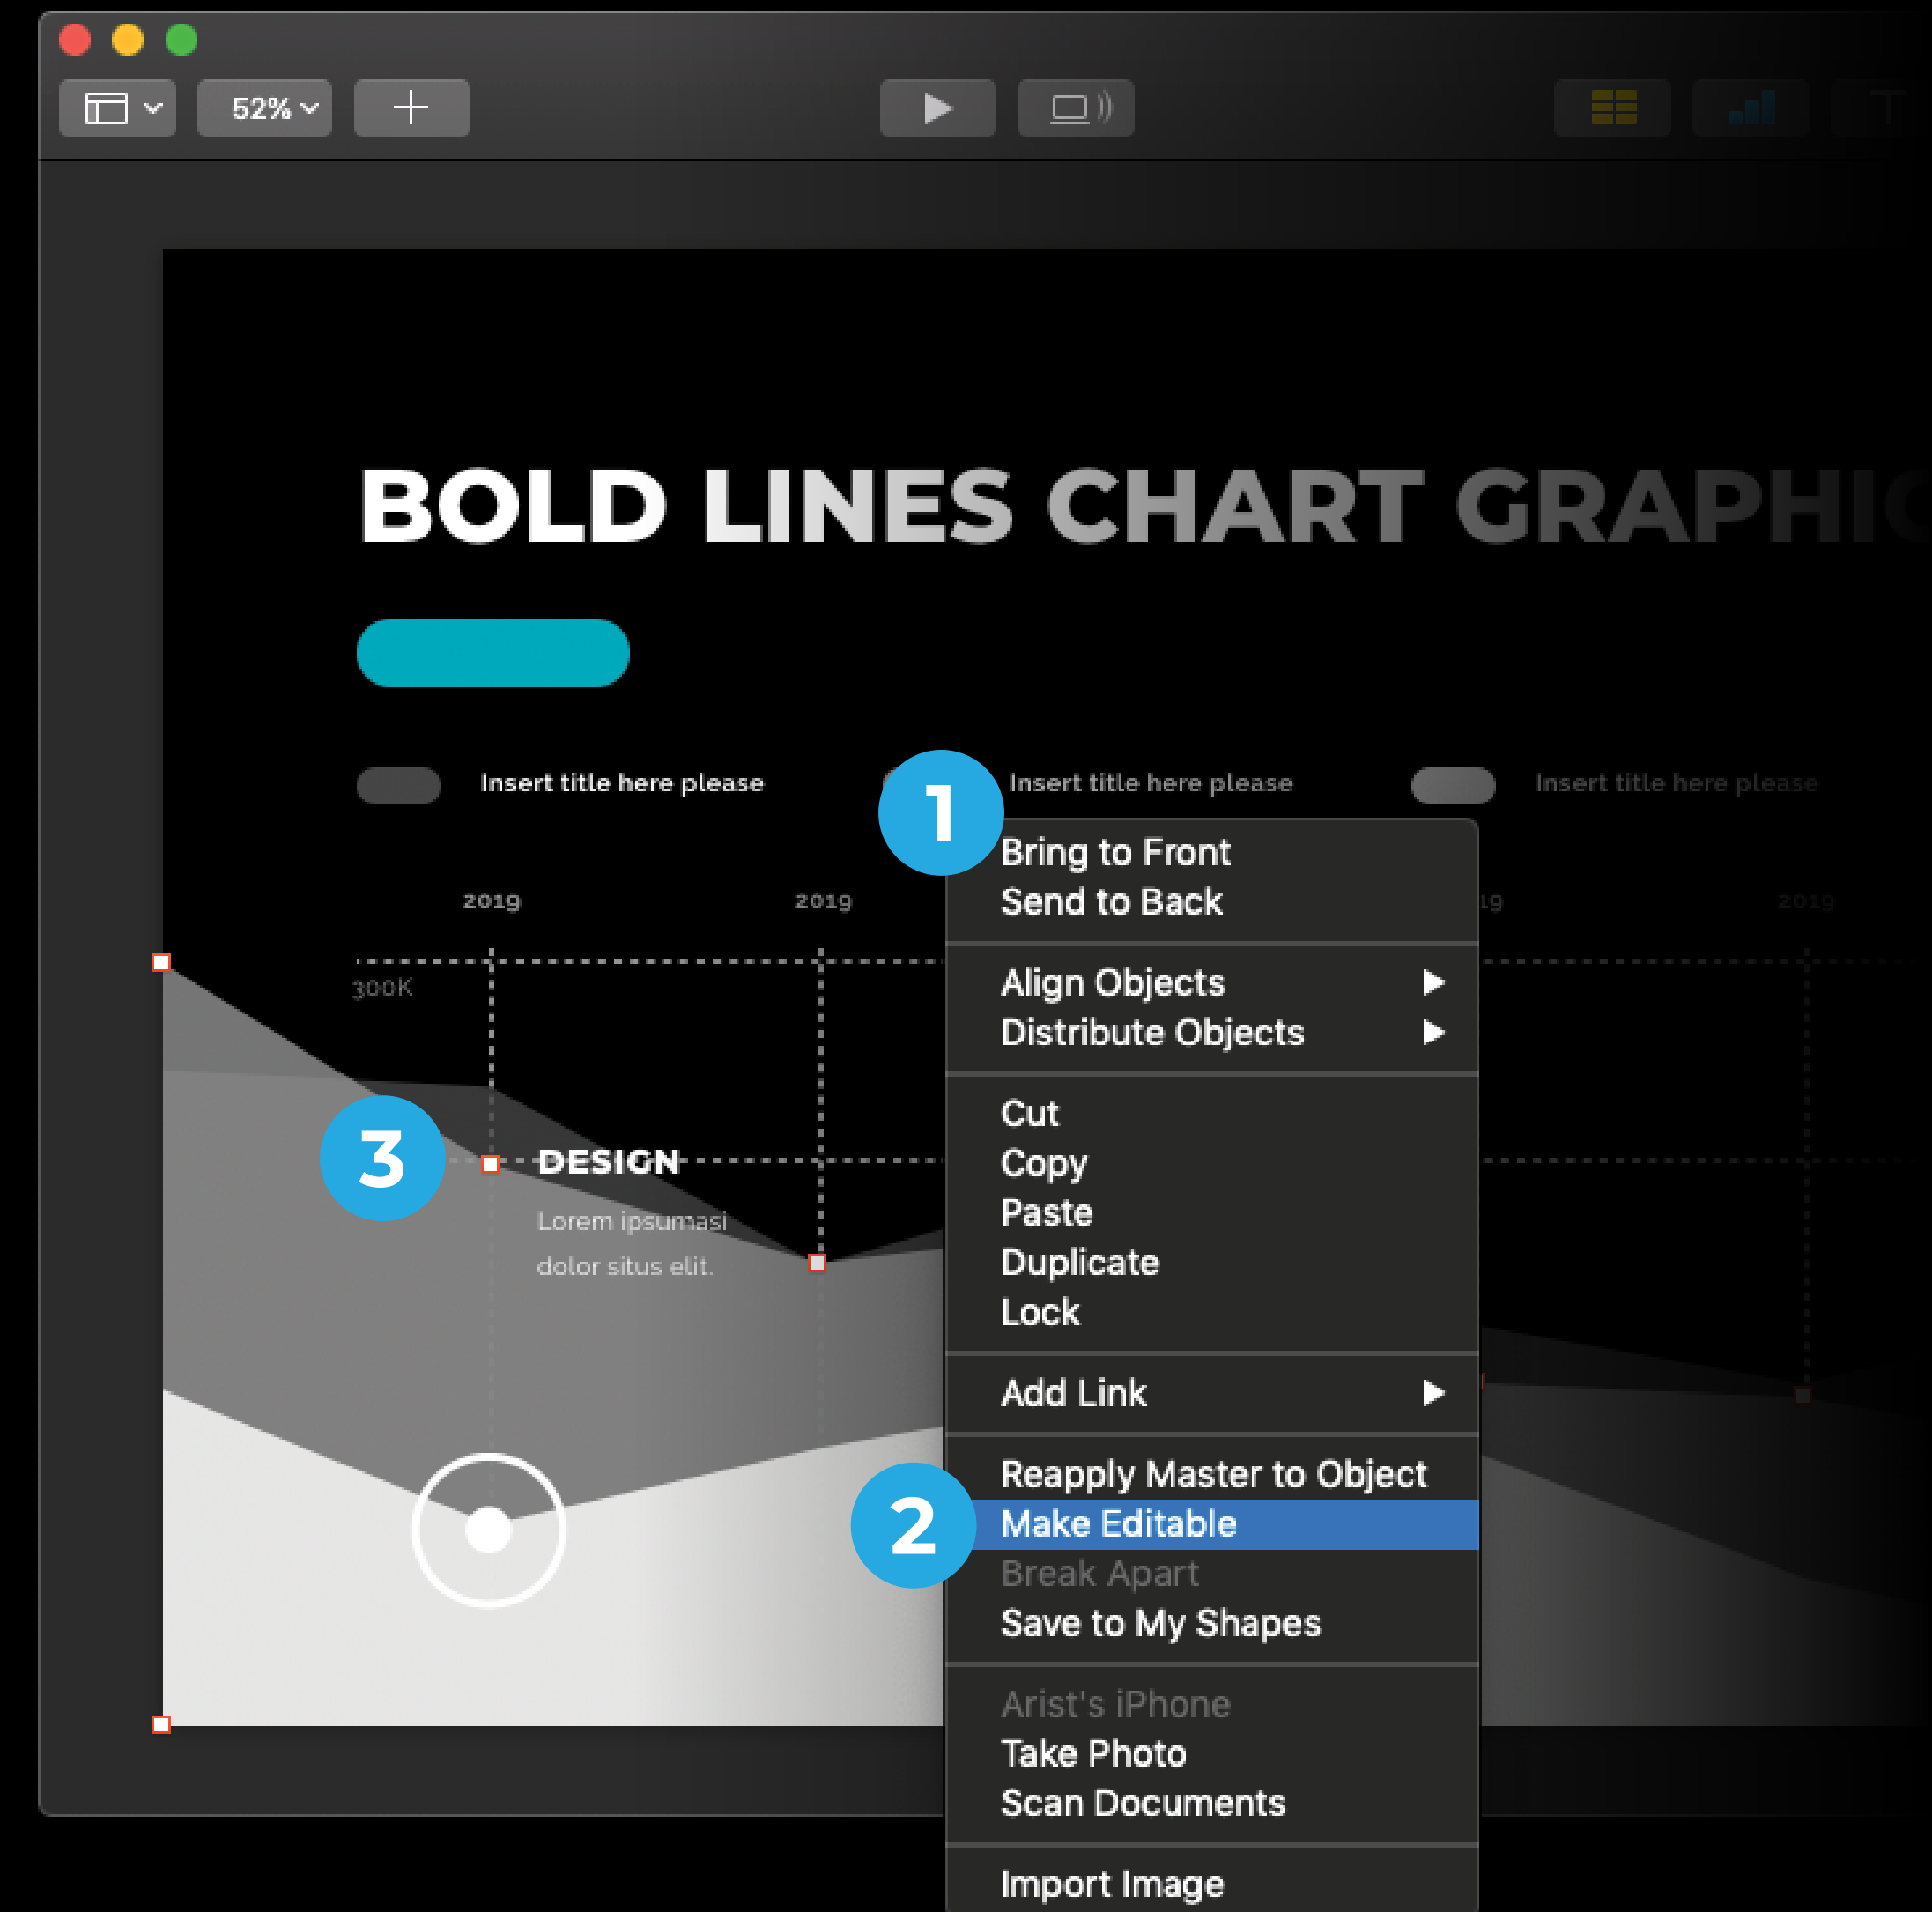

Vector Infographics

1 Select and **Right Click** object

2 Select **MAKE EDITABLE**
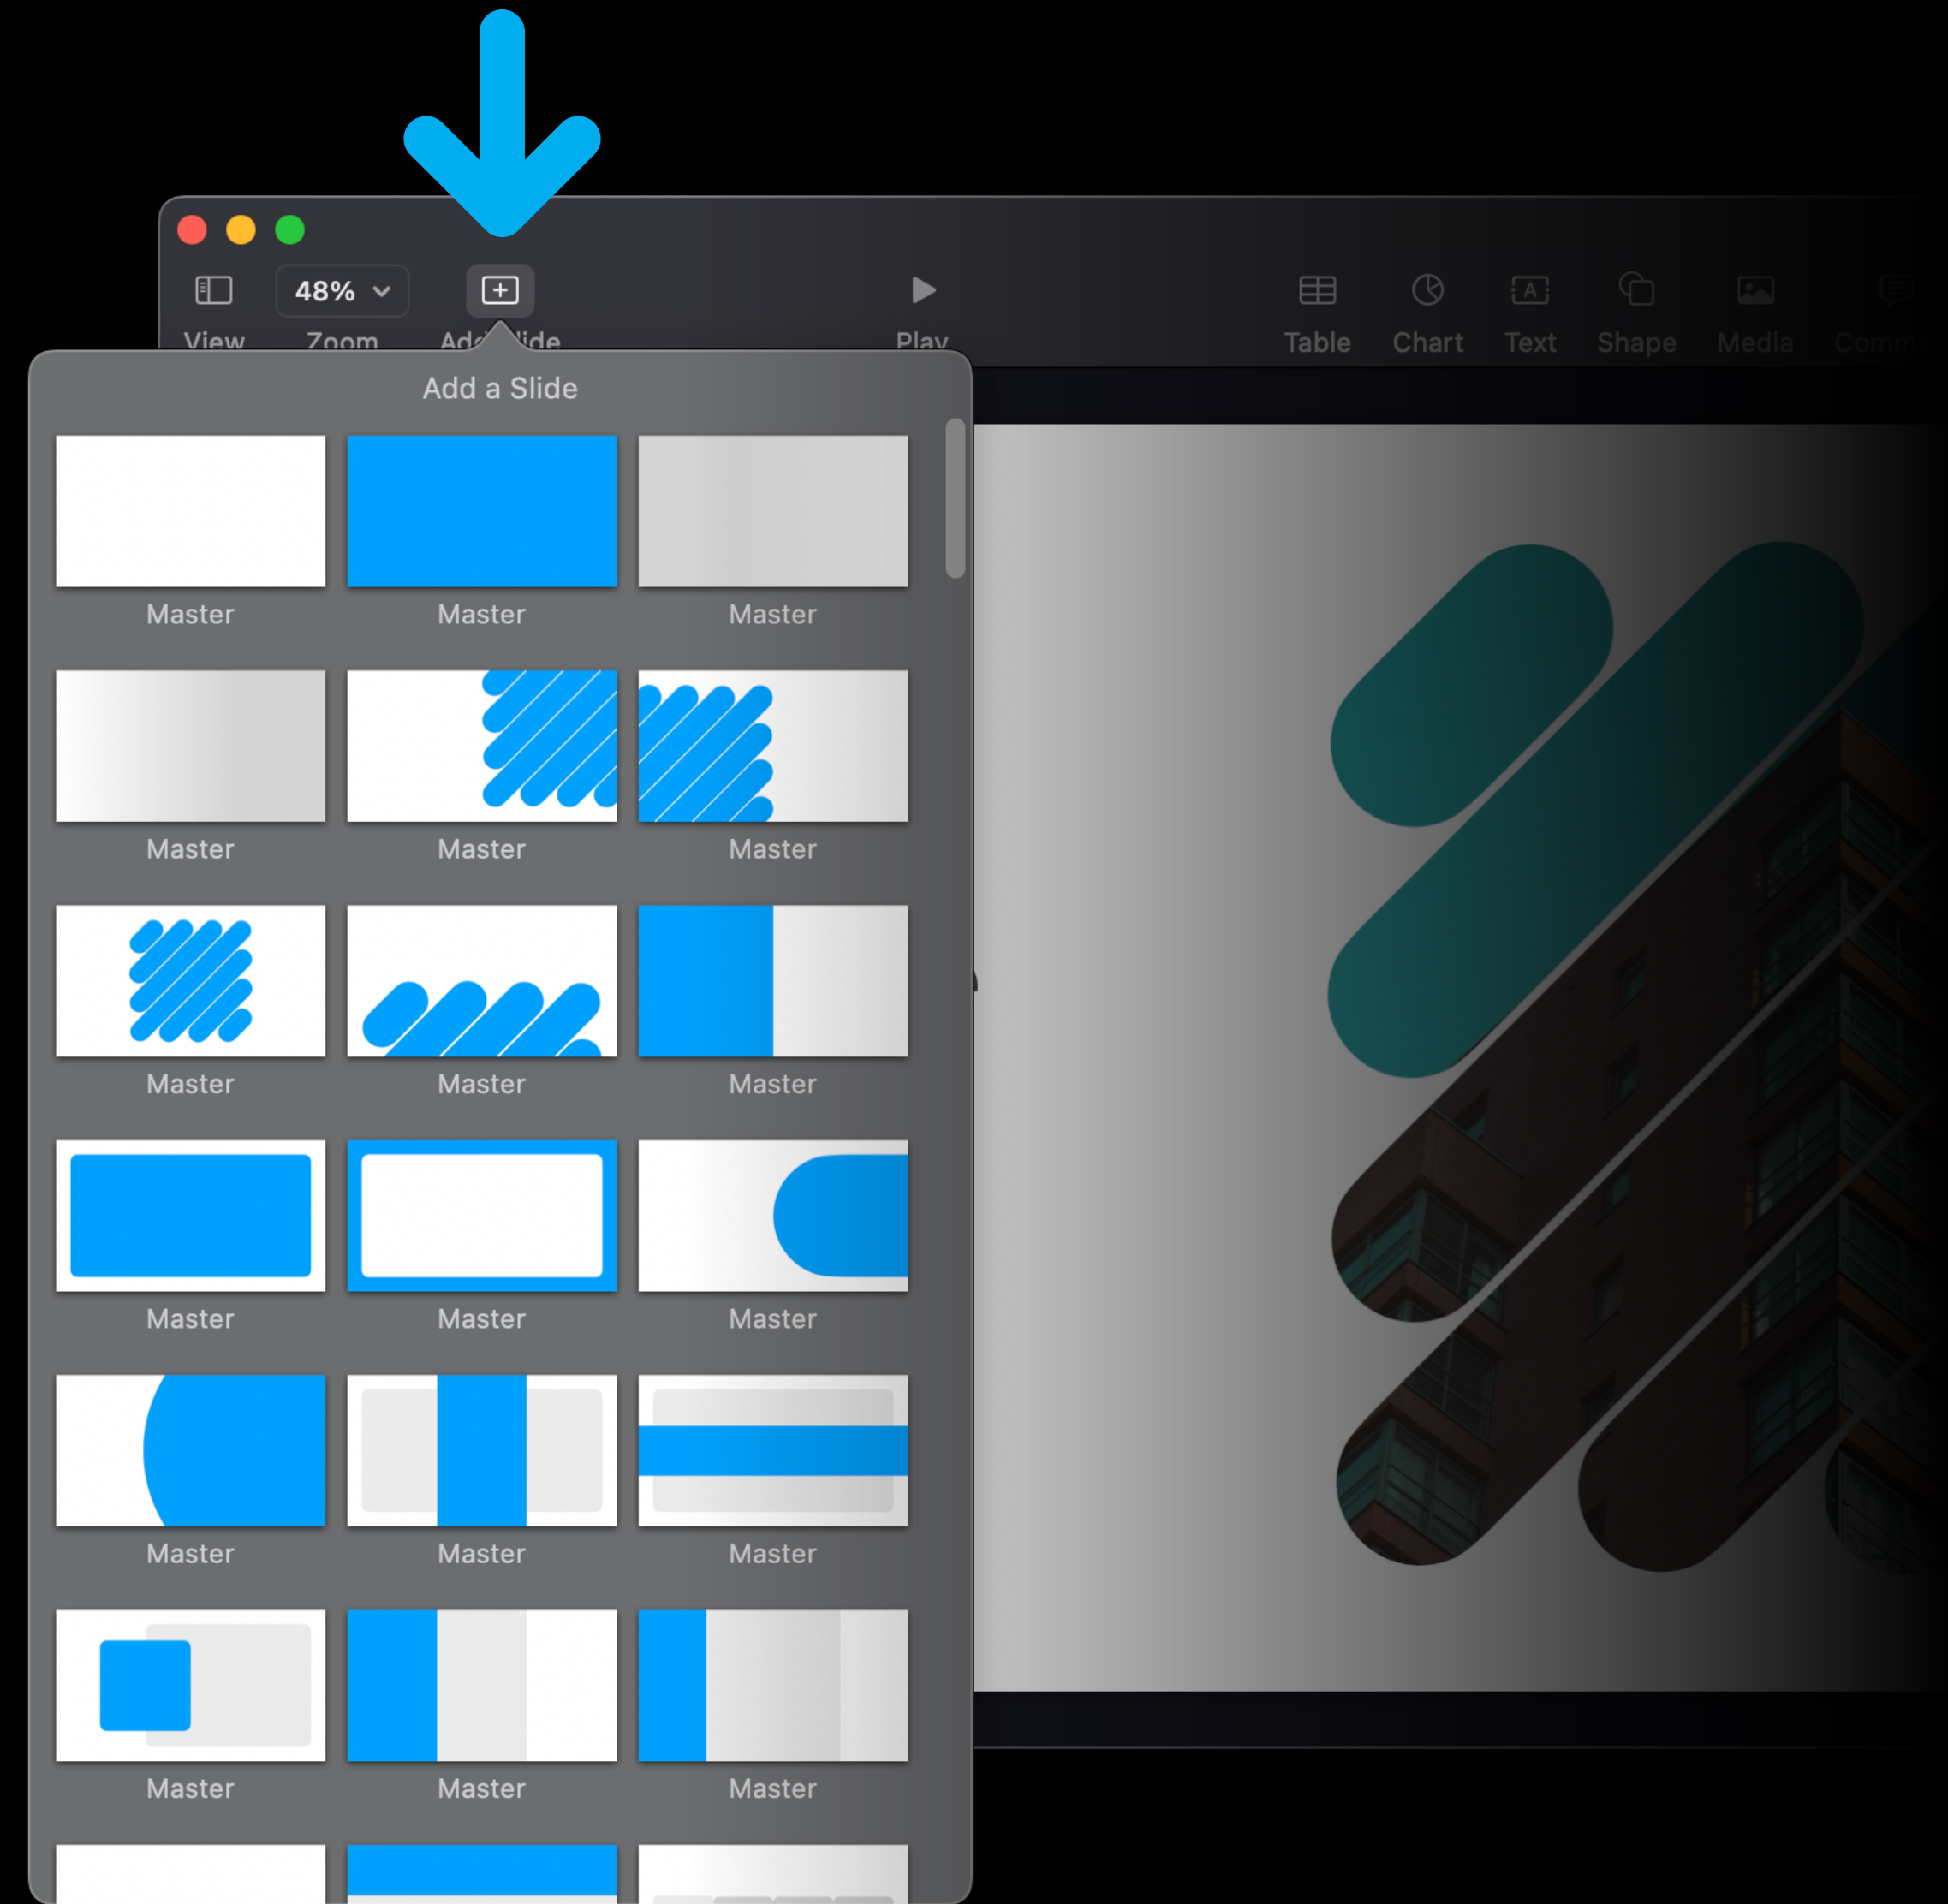

3 Modify the **dot points**

! *Some elements are in groups. Double-click the group then repeat steps to edit the content*

Slide Masters

You could build **new slide from scratch** and keeping the same design consistency at the same time using **Slide Masters**. Just add slide by clicking **ADD SLIDE** and choose from tons of options available.

Thank you!
