

KANAL POWERPOINT TEMPLATE

Design By : kylyman

Q : what should i do first

A : open help file and download the fonts used on Kanal Powerpoint

Q : wheres the link

A : here the link

lato : <https://fonts.google.com/specimen/Lato>

FontAwesome : <http://fontawesome.io>

Q: what file type is this ?

A: this is a .key for OSX keynote

Q: how many Keynote files are in the pack ?

A: 1 file .key, 1 file .key for keynote 09, documentation.pdf

Q: can i change the colors to match my brand ?

A: yes, you can change the color

First make color palette

and than Design tab -> color (on the right corner)

select element you want to change the color

Q: are the graphs editable ?

A: yes, you can put your own data. however you will need to manually make change to the infographic element

Q: are the images included in the file ?

A: no, unfortunately based on copyright laws they are now.

Q: are the infographic in vector format ?

A: yes, all the element provided are vector format for easy use and color change

Q: how i change the image ?

A: you can drag and drop you image to placeholder

Thanks & Good Luck with your Presentation
