

The font is crucial for the template's basic appearance and design. All template has their fonts and it uses more than one font. Sometimes there are more than three fonts. The recent templates always use the free font. **So you should install the required fonts before you open the template.** It allows you to use the template completely.

\* Required

#### DOWNLOAD FONTS:

MAIN FONT

Step **01** DOWNLOAD

The screenshot shows the Google Fonts interface for the Roboto font. At the top, there are tabs for 'Select styles', 'Glyphs', 'About', and 'License'. Below the tabs, there's a preview area with a text input field containing 'Almost before we knew it, we had left the ground.' and a font size dropdown set to '64px'. There are three style options listed: 'Thin 100' (selected), 'Thin 100 Italic', and 'Light 300'. Each style has a 'Select this style' button to its right. A blue line with an arrow points from the 'Download family' button at the bottom right of the interface back up to the '01 DOWNLOAD' step header.
