

THANK YOU

for purchase our product

We believe that our effort to create a full product, help a lot of people in their jobs, to save time in life for other good things

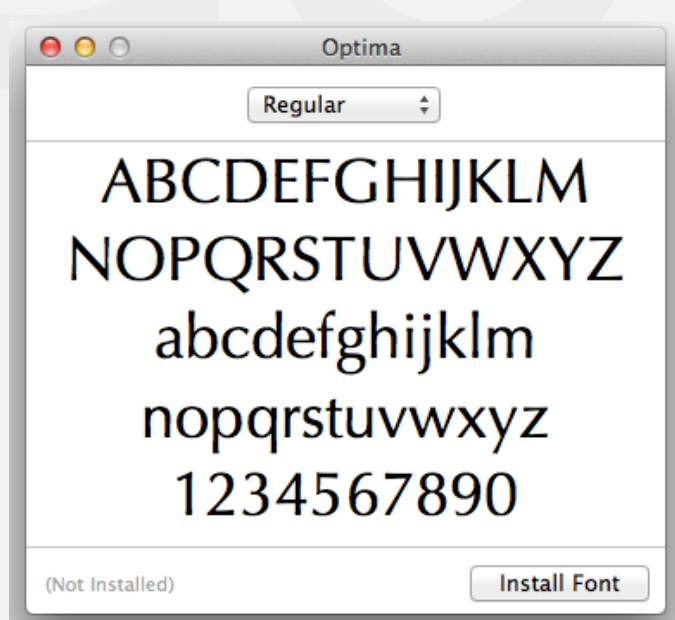

If you have any questions or suggestions, please email us on goashape@gmail.com.

IMPORTANT NOTICE

Inside product package is a file called "fonts guides" inside you will find links to download all the necessary fonts.

[Install all fonts!](#)

PREVIEW AND INSTALL FONTS

For proper functionality of the template, please install all fonts. You can download them for free from the attached links and use them for free. If you see a warning that the absence of other fonts that were not listed, please ignore it. It will not affect the presentation. If you do not want this message will appear each time you open the file, check the "Do not show this warning for this presentation." after being shown a warning in Keynote.

To preview a new font that you downloaded or have on a disc, double-click the font file. Font Book will display a sample of the font. You can change the typeface (if others are available) via the pop-up menu at the top of the preview window.

If you want to install the font so that it can be used in documents you create or view, click the "Install Font" button that appears below the preview of the font.

Please notice that this is Keynote template and is not PowerPoint.

WHICH FILE USE?

Keynote master file is with extension .key

For older Keynote program versions is file called at the end "old key" .key

We recommend to install the latest version of Keynote program for full product functionality. With older versions, you lose some settings such as transitions, effects or charts.

I DO NOT HAVE A KEYNOTE, HOW DO I USE THE PRODUCT?

PC (Windows) users can join Keynote, too! With iWork for iCloud, you and your team can access all your presentations in any Mac or PC web browser. Just sign in to iCloud.com, open Keynote, and start editing.

HOW TO ADD PHOTOS?

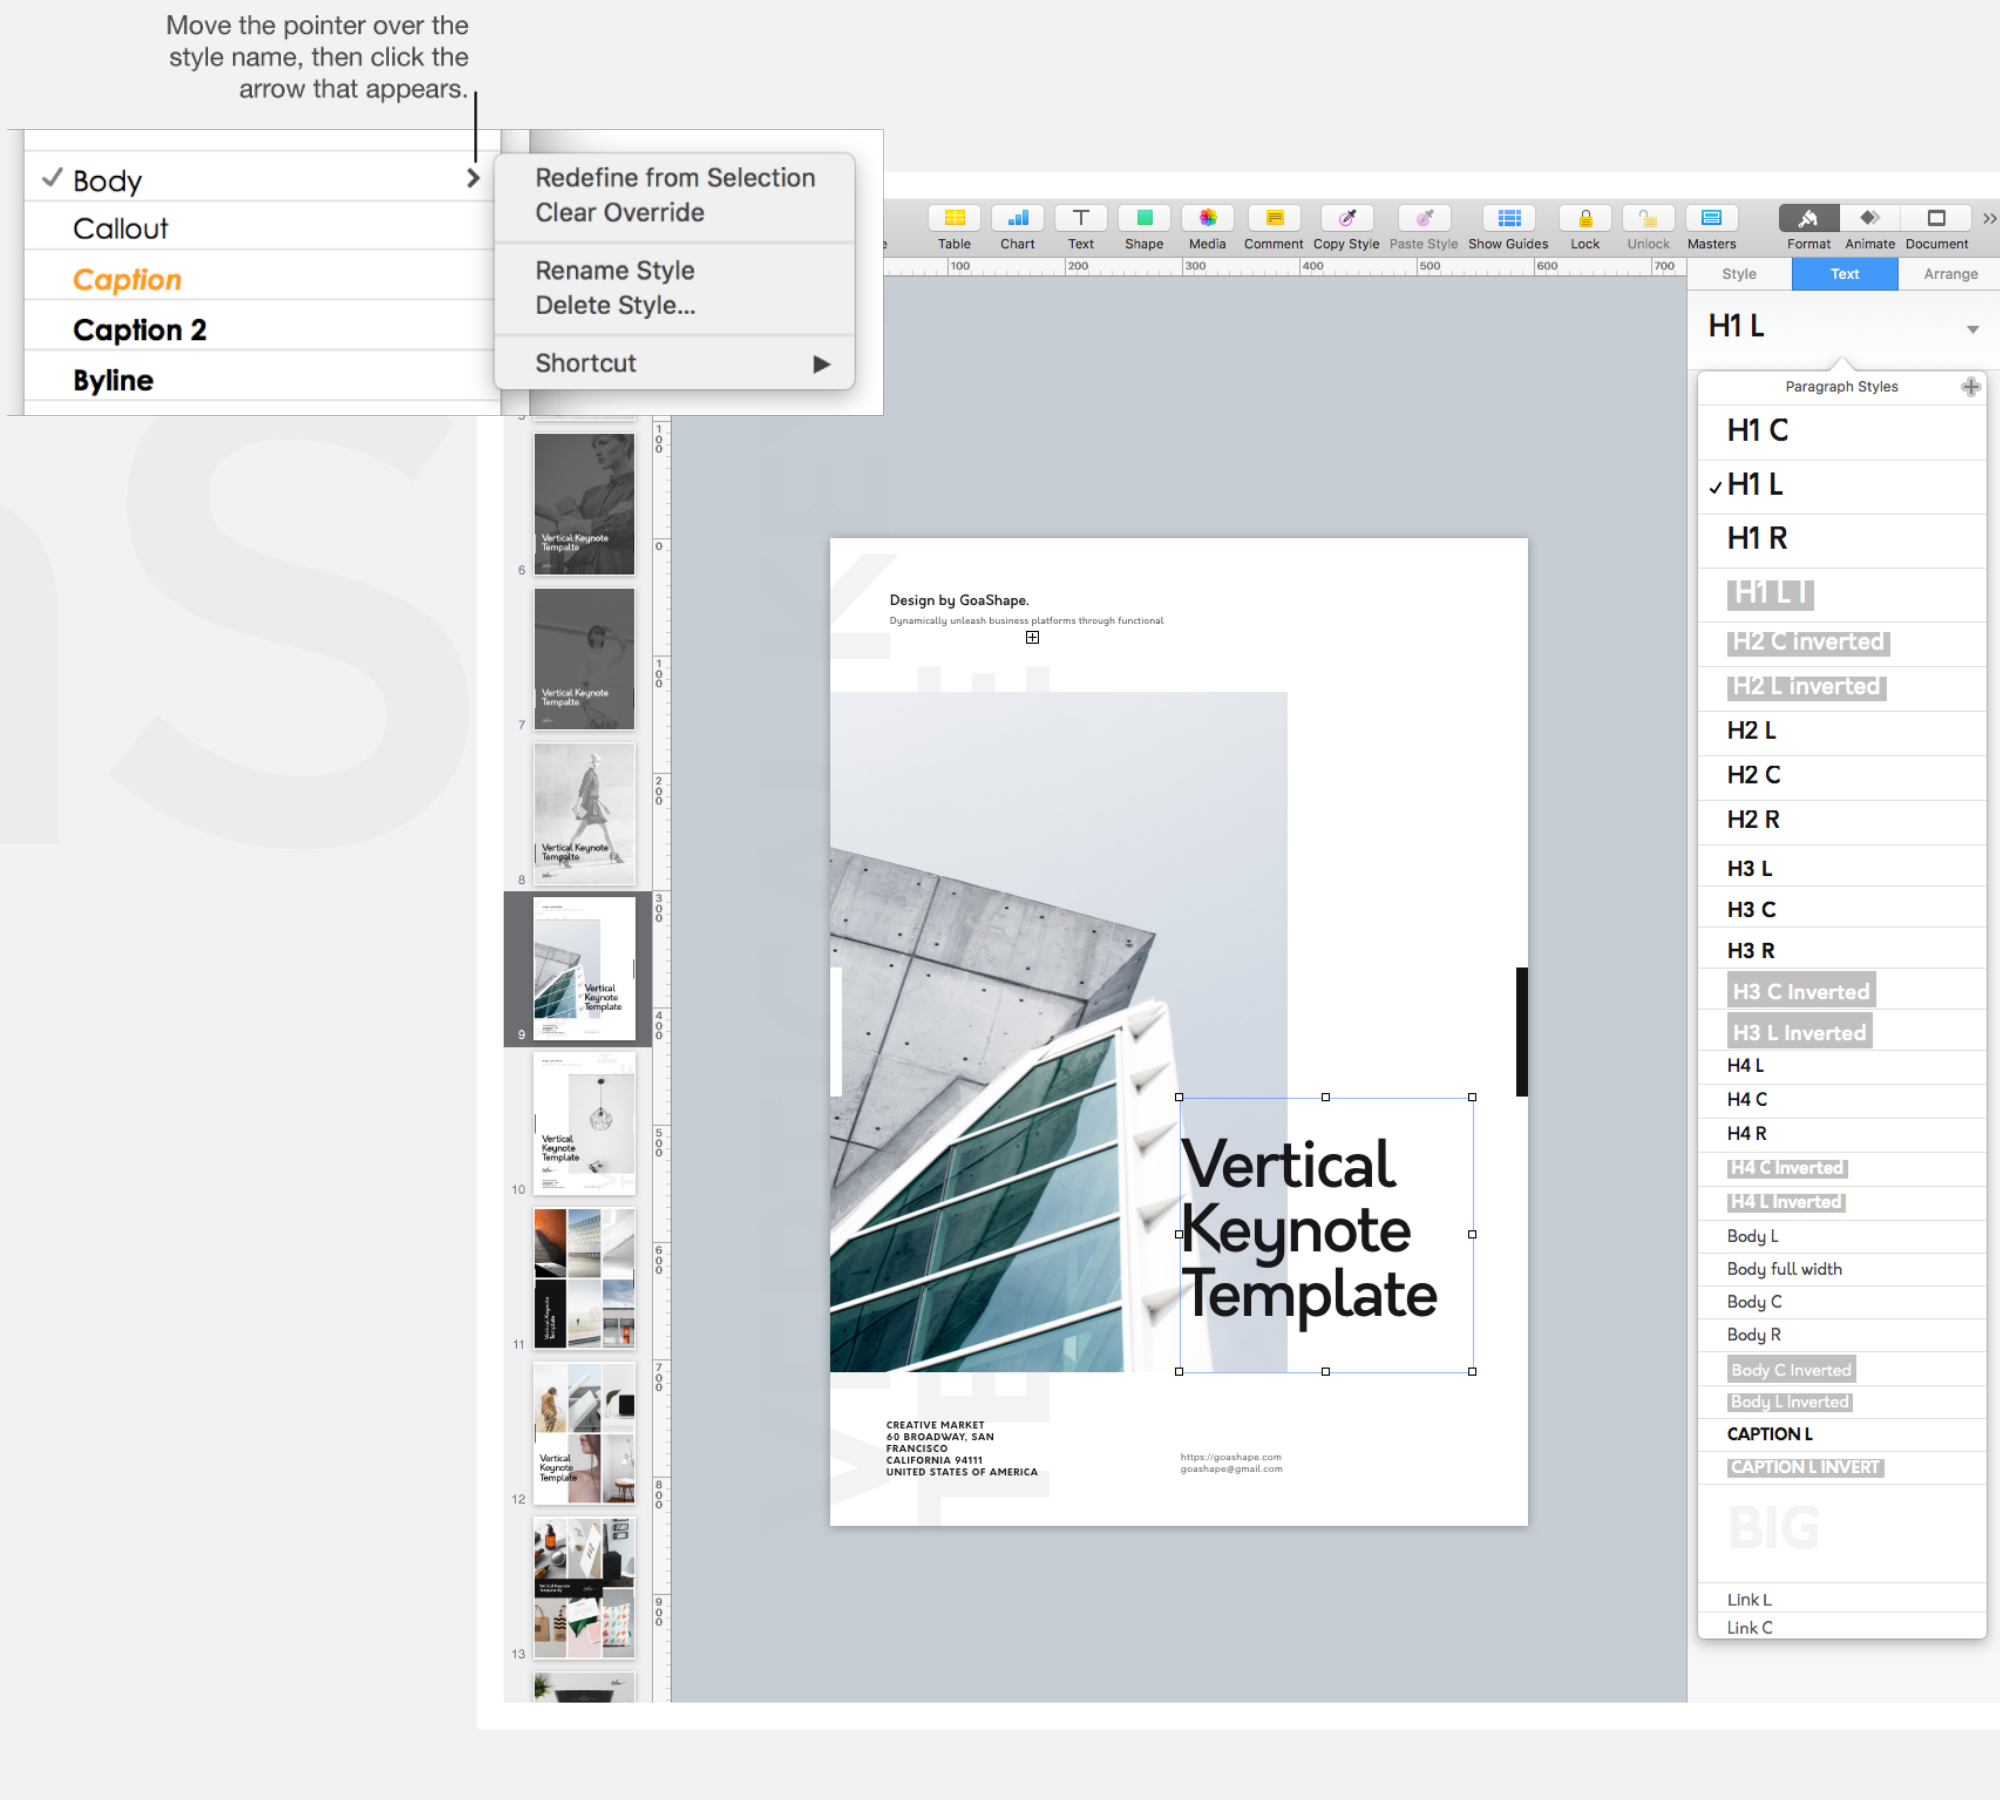

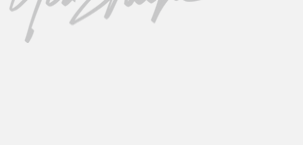

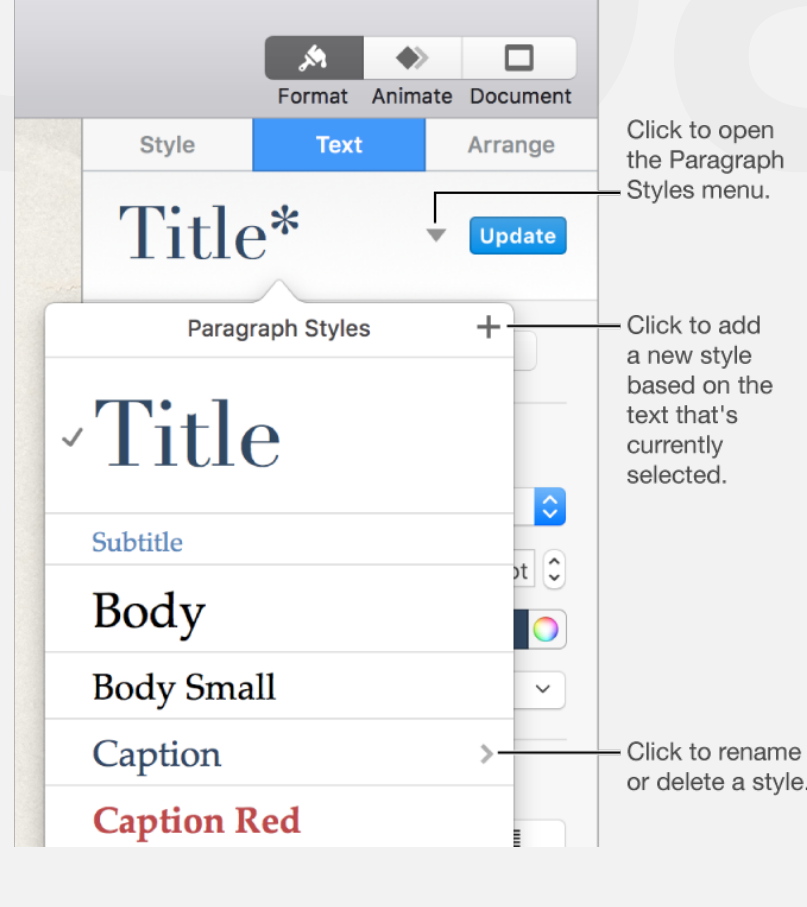

1. Find your picture in your folder
2. Drag and Drop to the shape

And it's very simple to just grab those and drag them in... The green circle with a plus symbol indicates it's going to be... added, and I can see that three images are in the drag... When I let go, they are dropped in...

USING PARAGRAPH STYLES

Quickly make global changes to the look of text in your presentation: For example, if you apply the Heading style to all the headings in a presentation, and later decide you want to change their color, you can change the color of the Heading style itself, and all the headings are updated automatically.

MORE PRODUCTS?
