font download.

FIRST AND VERY IMPORTANT STEP.

This template is using additional free fonts to make it works. Please make sure you download and install this font(s) below before you begin to use the template. Ignore any missing fonts warning other than below.

Montserrat

<https://www.fontsquirrel.com/fonts/montserrat>

Raleway

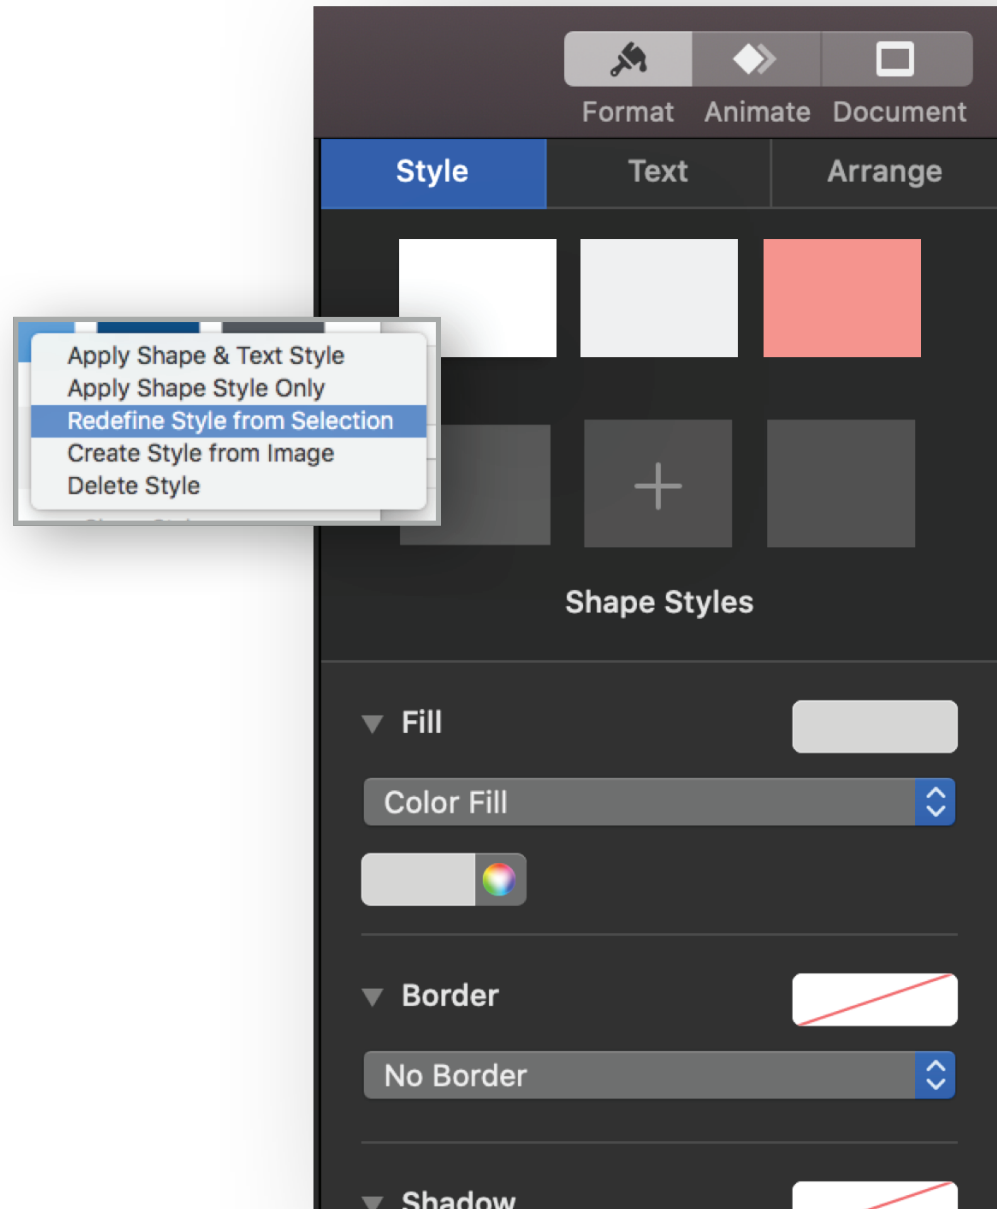

<https://www.fontsquirrel.com/fonts/raleway>

theme colors

You could change color used in overall slide by using COLOR MODIFIER slide. Find this modifier slide is SKIPPED and placed on the very first slide on each template.

Follow the instruction within this slide to modify the colors.

CHANGE TEMPLATE COLORS

photos & videos.

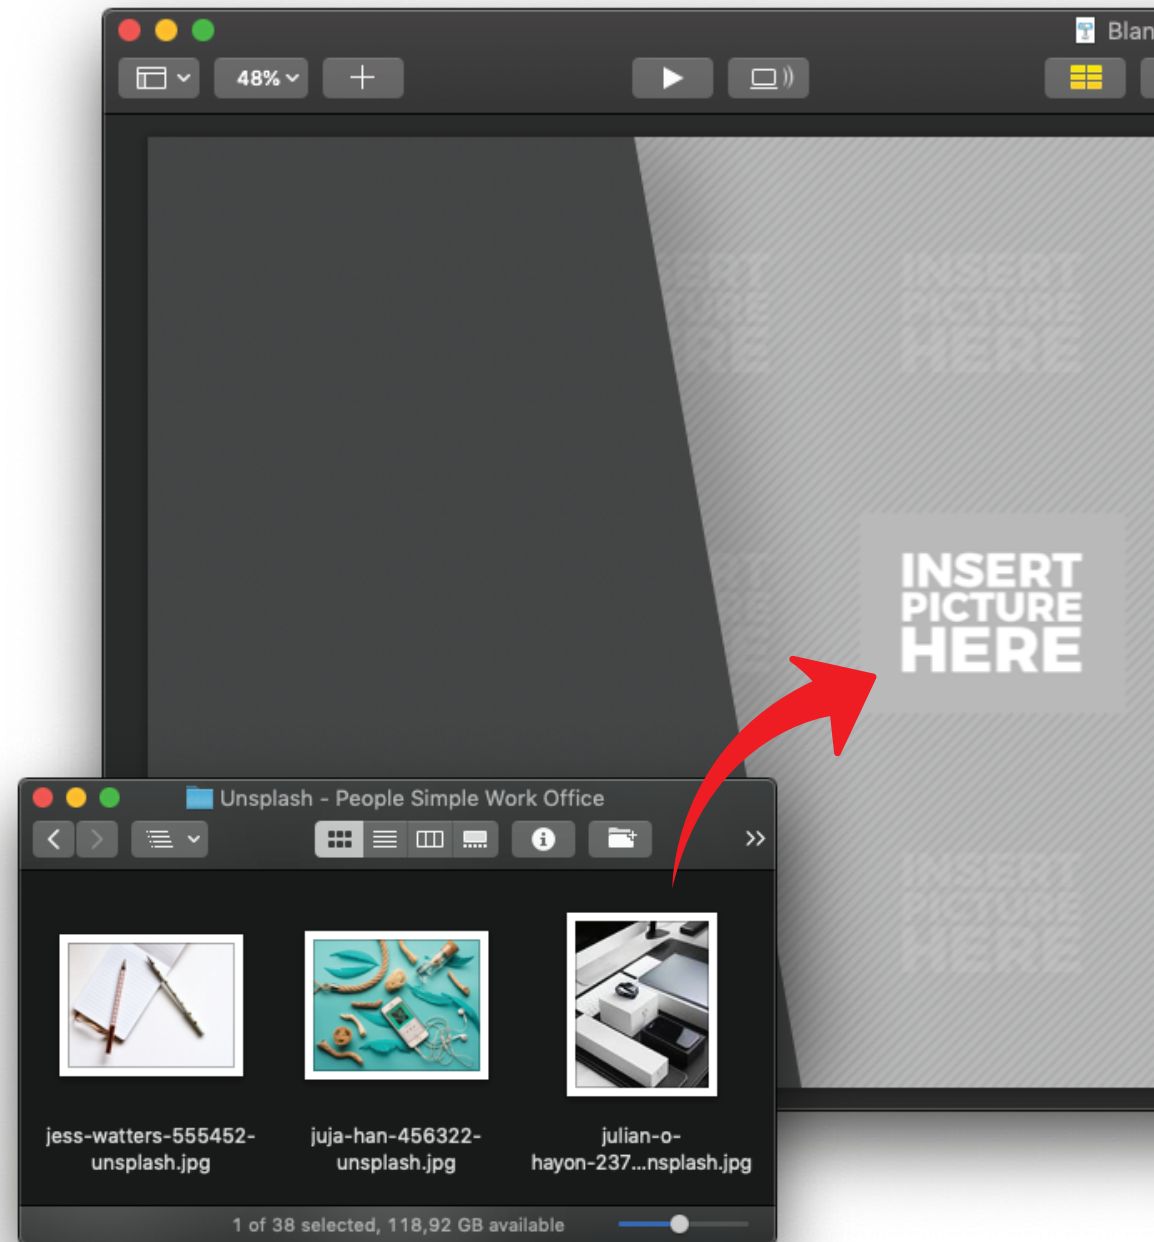

To put photo or video to your presentation, it just as simple as drag and drop.

Just drag your images, and drop right to the sign says INSERT PICTURE HERE or DROP VIDEO HERE for video, and you're good to go!

Please note that some small case you can't drop image to small placeholder.

This is how to fix :

- 1. Copy your image file (CMD+C)**
- 2. Select the image placeholder on your Keynote**
- 3. Paste your image file (CMD+V)**

master slides.

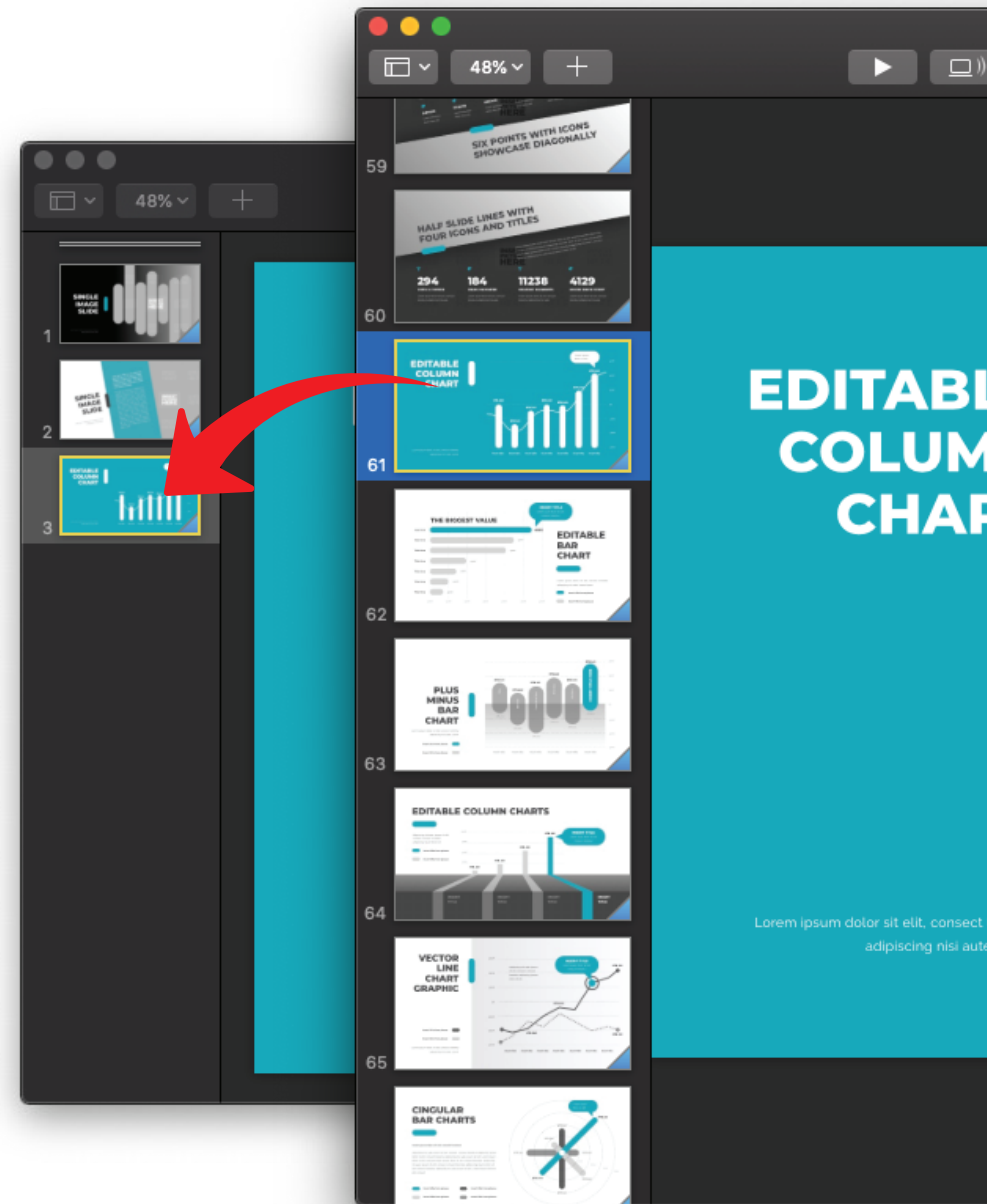

You can create new slide from master slide, just add slide by clicking “Add Slide”

drag & drop.

While opening multiple instance of template, select and drag the slides you want on the NAVIGATOR pane from another keynote then drop it to your new slide's NAVIGATOR pane.

This way, you could combine between all colors schemes, and manage it to create slide sequence of your own.

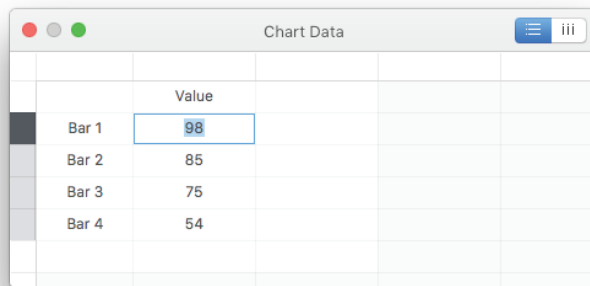

smart charts.

CHANGE THE SMART CHART VALUES.

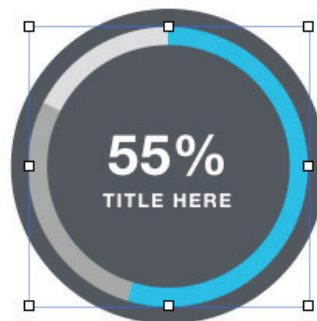

Using smart charts is so simple. Click the charts, and select

Edit Chart Data

	Value
Bar 1	98
Bar 2	85
Bar 3	75
Bar 4	54

It will show a table that represents the data for the charts, and it's separated between colors and value.

Edit Chart Data

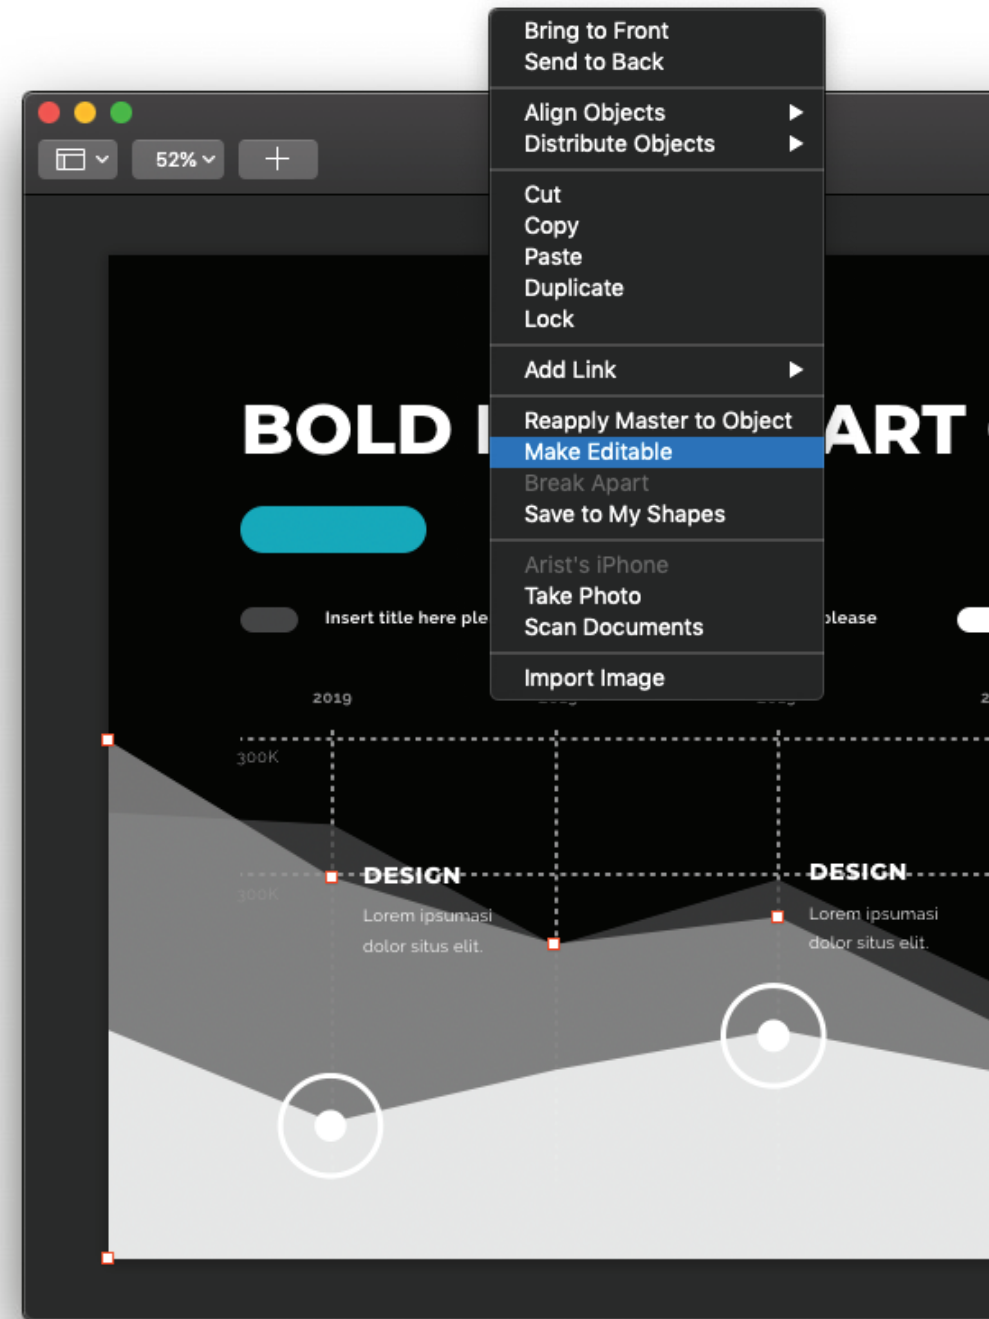

TIPS :

Some charts may be covered by some object on the top layer. Please make sure you click the chart until you see the button.

vector infographics.

Right click the object and select MAKE EDITABLE to modify the shape.

May some elements on infographics is grouped, so you need to double click the group to modify the content inside.

**thank
you!**
