font download.

This template is using additional free fonts to make it works. Please make sure you download and install this font(s) below before you begin to use the template. Ignore any missing fonts warning other than below.
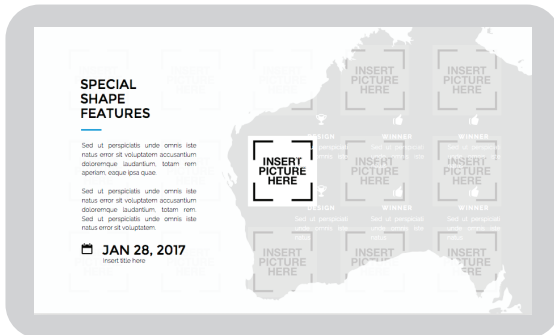

Montserrat

https://www.fontsquirrel.com/fonts/montserrat

Raleway

https://www.fontsquirrel.com/fonts/raleway

change photos.

To change the picture on the shape :

1

Select the grey area with INSERT PICTURE HERE sign on it. Press Delete / Backspace to clear the images.

2

You will see DRAG PICTURE TO PLACEHOLDER OR CLICK ICON TO ADD text on top side of the placeholder. Just follow those instruction to add your image.

3

Once the new image added. Right click the image and select Send to Back. DONE.

Sometimes you need to adjust the picture inside the placeholder, here is how :
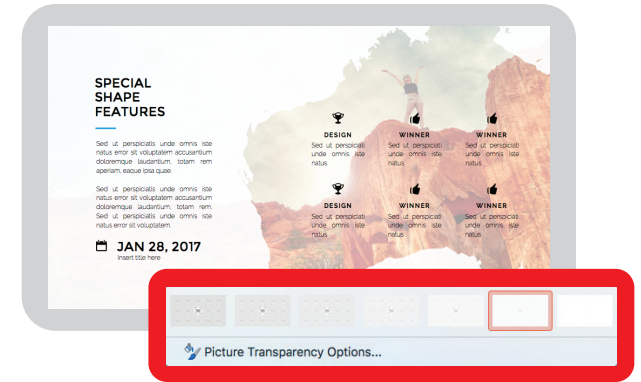

1

To adjust the picture, select image and select Crop.

2

Adjust the Bounding Box to the fit inside the shape.
You can move or resize the picture inside without compromising placeholder.
To make it easier, hold SHIFT/ALT while make adjustment.

3

Add a TRANSPARENCY effect to most background picture.

Please read article below for how to make transparancy on various version of PowerPoints

https://goo.gl/vFycF9

mockup images.

1

LANDSCAPE PHONE

Copy	⌘C
Paste	⌘V
Change Picture...	
Reorder Objects	
Reorder Overlapping Objects	
Group	▶
Bring to Front	▶
Send to Back	▶
Hyperlink...	⌘K
Save as Picture...	
Crop	
Size and Position...	
Format Picture	⌘1

2

Crop

3

A   B

Right click the picture on mockup,
select Change Picture,
then select the picture files.

The picture shape looks different depends on the original picture.
Don't panic, while the picture selected, select Crop on Picture format.

You will have 2 different bounding box :
A. Shape container bounding box.
B. Picture bounding box inside shape.

4

Adjust the A Bounding Box to the original shape. In this case, the shape is the screen of the device. To make it easier, hold SHIFT/ALT while make adjustment.
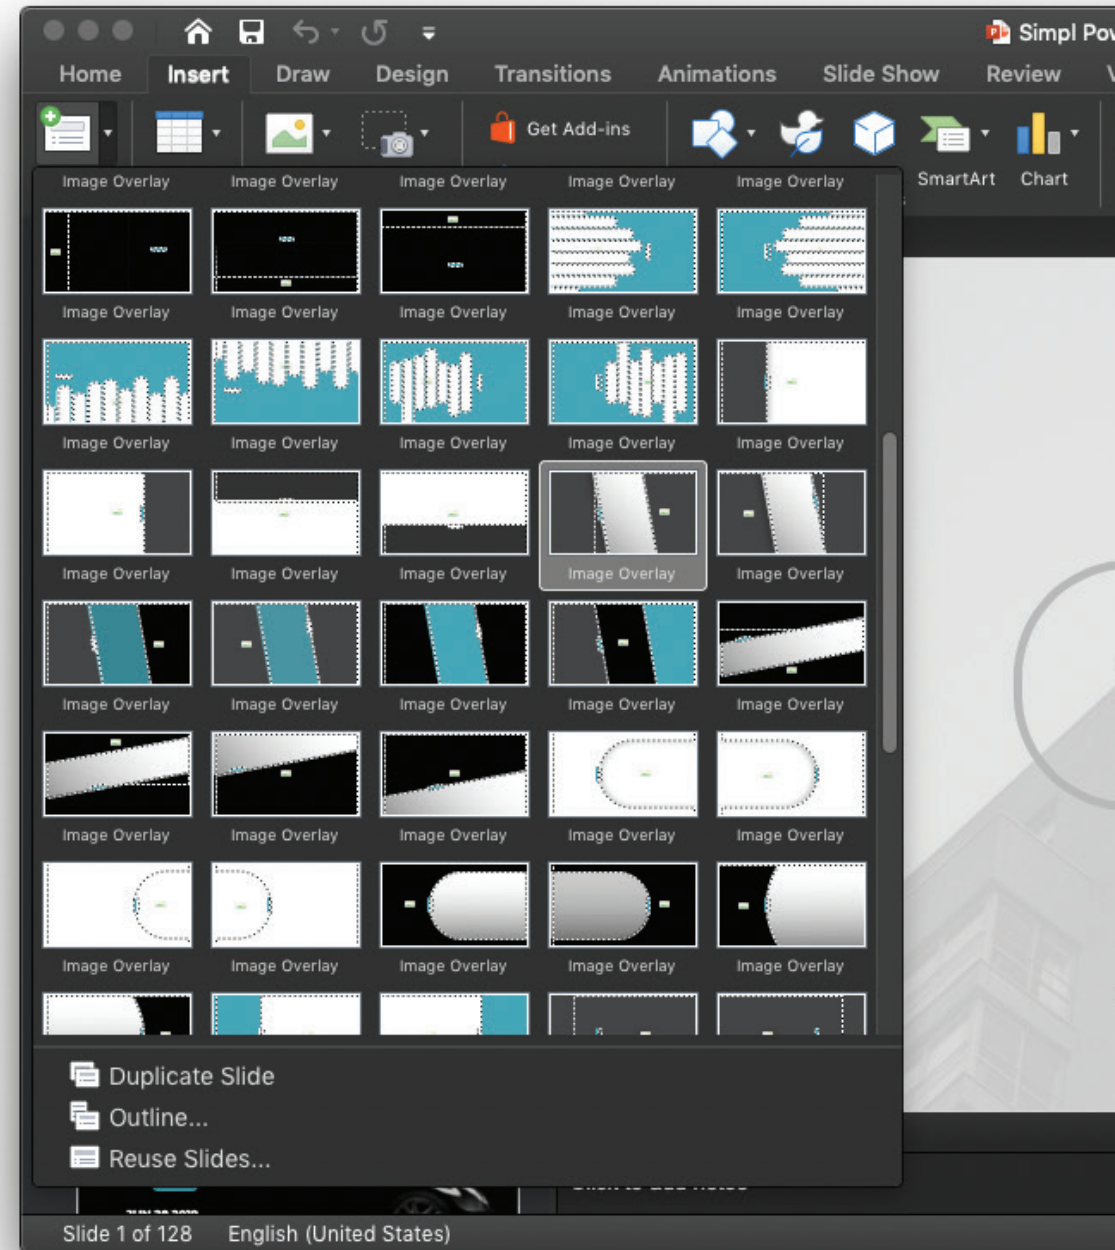

5

Adjust the B Bounding Box to the fit inside the shape. You can move and/or resize the image. To make it easier, hold SHIFT/ALT while make adjustment.
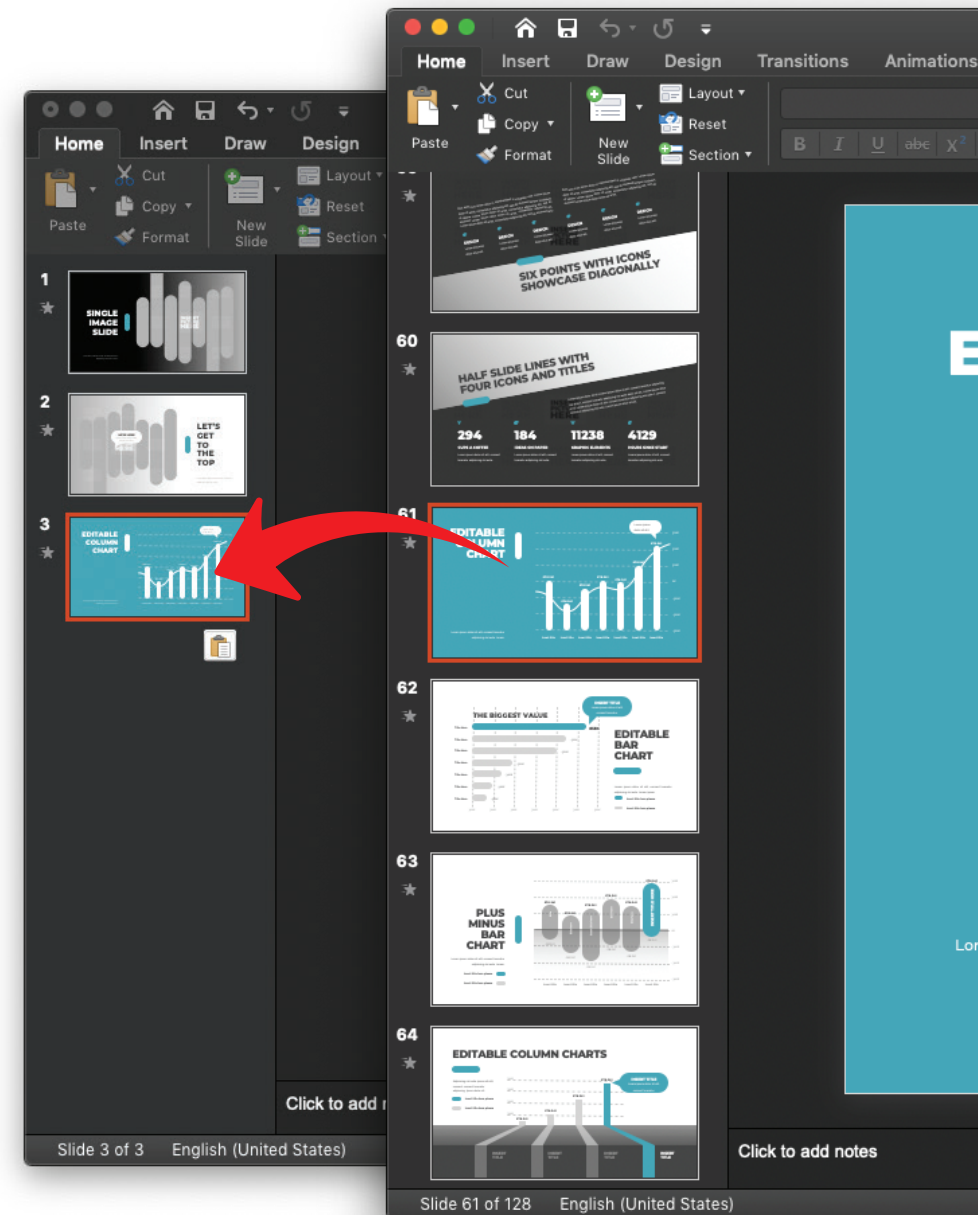

6

DONE ;)

slide masters.

You can create new slide from master slide, just click small arrow beside "New Slide".

drag & drop.

While opening multiple instance of template, select and drag the slides you want from another PowerPoint files then drop it to your new project's slides pane.
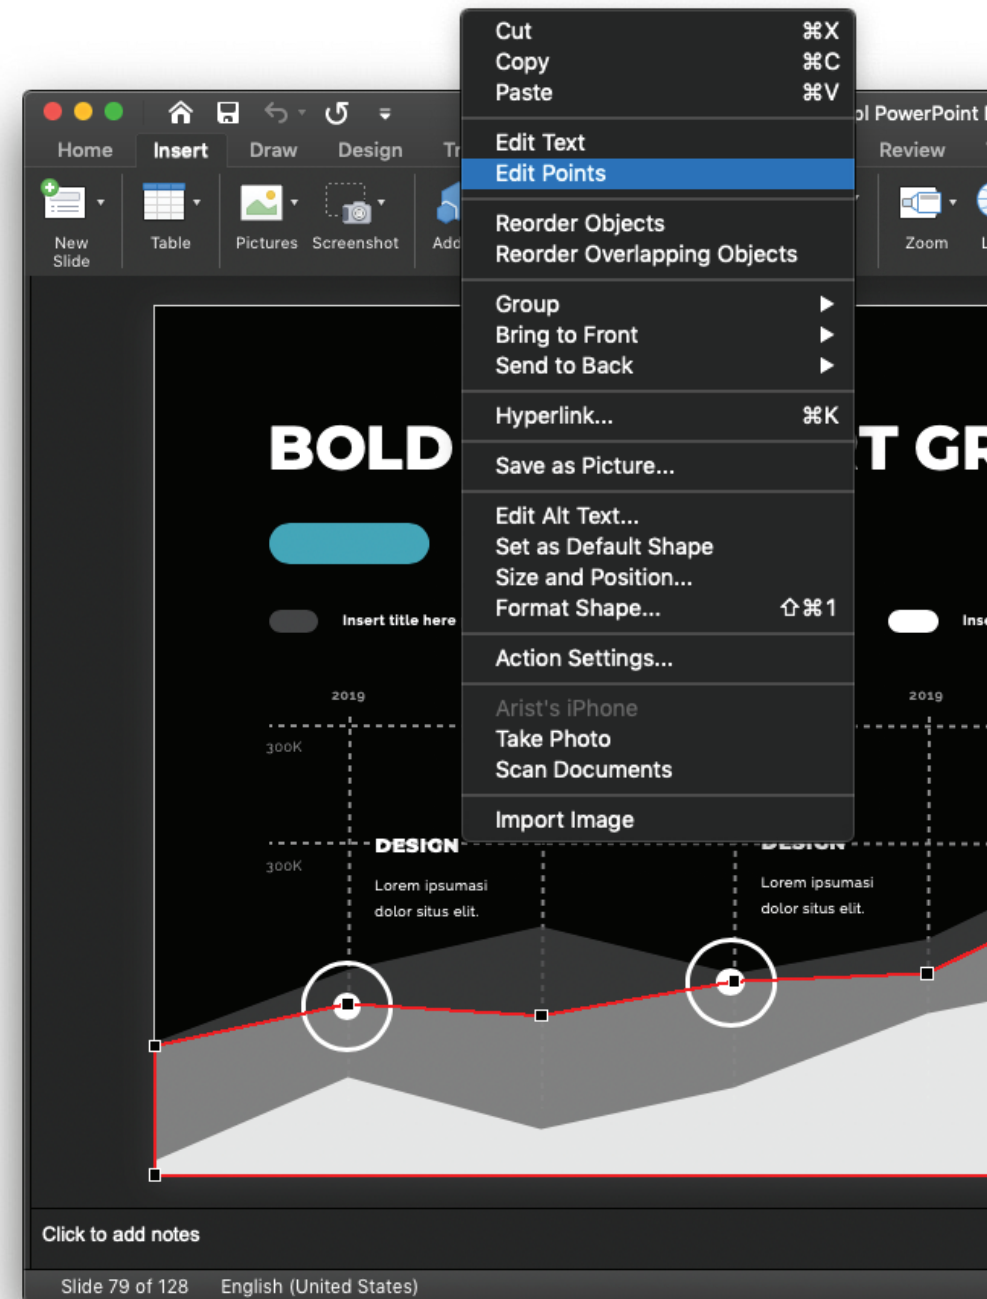

This way, you could combine between all colors schemes, and manage it to create slide sequence of your own.

vector infographics.

Right click the object and select EDIT POINTS to modify the shape.

May some elements on infographics is grouped, so you need to ungroup to modify the content inside.

thank you!
